QUESTION 1

You have a computer that runs Windows 7. Your network contains a VPN server that runs Windows Server 2008 R2. The server requires the use of a pre-shared key.

You need to create a VPN connection to connect to the network.

Which type of VPN connection should you create?

- A. IKEv2
- B. L2TP
- C. PPTP
- D. SSTP

Correct Answer: B

QUESTION 2

You manage the Windows 7 Professional computers for a small architecture firm. All computers operate in workgroup mode.

The lead engineer asks you to enable employees to share CAD files located on their desktop computers with all of the other members of the firm.

You create a HomeGroup on the lead engineer's computer.

You need to configure the rest of the computers in the firm to join this HomeGroup.

Which four actions should you perform in sequence? (To answer, move the appropriate four actions from the list of actions to the answer area and arrange them in the correct order. 1)

Select and Place:

	Answer Area
Provide the HomeGroup password.	
Choose the libraries that you want to share to the HomeGroup.	
Click Join Now in the Control Panel/HomeGroup utility.	
Configure each computer with the same workgroup name.	
Identify the current network connection as a Home location.	

Correct Answer:

	Answer Area
	Identify the current network connection as a Home location.
	Click Join Now in the Control Panel/HomeGroup utility.
	Choose the libraries that you want to share to the HomeGroup.
Configure each computer with the same workgroup name.	
	Provide the HomeGroup password.

Note:

Step 1:

For home group to work you do need to have your network location set to home. That is why it is called Home group. It is a safety control as only computers connected to your home network can be join a Home group. All computers that you

want to join must also be set to Home location.

Step 2:

To join a homegroup, follow these steps on the PC that you want to add to the homegroup:

Open HomeGroup by clicking the Start button Picture of the Start button, clicking Control Panel, typing homegroup in the search box, and then clicking HomeGroup.

Click Join now, and then follow the steps on your screen.

Step 3:

Step 4:

QUESTION 3

A company has client computers that run Windows XP. The company plans to deploy Windows 7 to all client computers. Each employee will keep the same computer.

You need to migrate the client computers from Windows XP to Windows 7 while maintaining each user's files and settings.

Which actions would you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them into the correct order).

Select and Place:

Install Windows 7.	
Apply data by using the LoadState tool.	
Gather data by using the ScanState tool.	
Gather data by using the Windows 7 Upgrade Advisor.	
Gather and apply data by using Windows Backup and Restore.	
Gather and apply data by using the Files and Transfer Settings Wizard.	

Correct Answer:

	Gather data by using the ScanState tool.
	Install Windows 7.
	Apply data by using the LoadState tool.
Gather data by using the Windows 7 Upgrade Advisor.	
Gather and apply data by using Windows Backup and Restore.	
Gather and apply data by using the Files and Transfer Settings Wizard.	

QUESTION 4
