QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses a network ID of 10.0.0.0/8.

The company opens a new office that uses a network ID of 10.5.0.0/16. The office has three floors. Each floor has a VLAN. The network ID of each VLAN is 10.5.10.0/24, 10.5.20.0/24, and 10.5.30.0/24.

You create a distribution point for the new office.

You need to ensure that the clients in the new office obtain content from the new distribution point.

Solution: Create an IP address range boundary from 10.5.0.0/16.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 2

You have a deployment of System Center Configuration Manager (Current Branch). Configuration Manager has the boundaries defined as shown in the following table.

Boundary name	Configuration	Type
Boundary1	Network: 192.168.128.0 Subnet mask: 255.255.0.0	IP subnet
Boundary2	Network: 172.16.128.0 Subnet mask: 255.255.255.0	IP subnet
Boundary3	172.16.10.15 to 172.16.10.100	IP address range
Boundary4	192.168.10.15 to 192.168.10.100	IP address range
Boundary5	fc07:45d4:5626:85b1	IPv6 prefix

Configuration Manager has the boundary groups defined as shown in the following table.

Boundary group name	Boundary
BG1	Boundary1, Boundary4
BG2	Boundary5
BG3	Boundary2, Boundary3

You install a new distribution point named DPI, and you add DPI to BG1 and BG3.

For each of the following statements, select. Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
A client computer that has an IPv4 address of 172.16.10.12 can use DP1.	<input type="radio"/>	<input type="radio"/>
A client computer that has an IPv4 address of 192.168.130.12 can use DP1.	<input type="radio"/>	<input type="radio"/>
A client computer that has only an IPv6 address can use DP1.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statements	Yes	No
A client computer that has an IPv4 address of 172.16.10.12 can use DP1.	<input type="radio"/>	<input checked="" type="radio"/>
A client computer that has an IPv4 address of 192.168.130.12 can use DP1.	<input checked="" type="radio"/>	<input type="radio"/>
A client computer that has only an IPv6 address can use DP1.	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 3

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario.

Your network contains an Active directory forest named adatum.com.

All client computers run Windows 10 Enterprise, Semi-Annual Channel (Targeted). All the computers are named by using the name of their respective department and an incremental three-digit number. For example, the first computer in

the sales department is named Sales001.

Several managers use tablets that run Windows 10 and have 3 GB of RAM. All other client computers have at least 8 GB RAM.

Adatum.com is synchronized to Microsoft Azure Active Directory.

Your company implements the Microsoft Store for Business.

You have a deployment of System Center Configuration Manager (Current Branch) that has discovery configured. All the client computers have the Configuration Manager client installed.

The company uses the applications shown in the following table.

Application name	Description
App1	A Microsoft Application Virtualization (App-V) virtual application
App2	An app that the company purchased from the Microsoft Store for Business and is licensed for offline use
App3	A 64-bit application that is deployed to all the client computers
SalesAppLite	An application used by users in the sales department on computers that have 3 GB of RAM or less
SalesAppFull	An application used by the sales department users on computers that have more than 3 GB of RAM

The company identifies the following requirements for software deployments:

- View the Upgrade Readiness data of all the client computers.
- Deploy App1 to the client computers in the marketing department.
- Deploy App2 to the client computers in the human resources (HR) department.
- Monitor the usage of App3.
- Deploy SalesAppLite to sales department computers that have 3 GB of RAM or less.
- Deploy SalesAppFull to sales department computers that have more than 3 GB of RAM.

You create a cloud-based distribution point that has a public name of d1594d4527614a09b934d470.

End of repeated scenario.

You need to meet the requirements for the HR department computers.

Which two actions should you perform? Each correct answer presents part of solution.

NOTE: Each correct selection is worth one point.

- A. Add the Microsoft Store for Business service to the Configuration Manager console.
- B. Create an App-V package.

- C. Add a cloud management gateway.
- D. Configure the Microsoft Operations Management Suite (OMS) connector.
- E. Create an application in Configuration Manager.

Correct Answer: AE

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses a network ID of 10.0.0.0/8.

The company opens a new office that uses a network ID of 10.5.0.0/16. The office has three floors. Each floor has a VLAN. The network ID of each VLAN is 10.5.10.0/24, 10.5.20.0/24, and 10.5.30.0/24.

You create a distribution point for the new office.

You need to ensure that the clients in the new office obtain content from the new distribution point.

You need to create a boundary for the new office.

Solution: Create an IP subnet boundary for 10.5.10.0/24, 10.5.20.0/24, and 10.5.30.0/24.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 5

You have a deployment of System Center Configuration Manager (Current Branch).

Your company has a main office and a branch office. The branch office has five users. Some users use laptops and some use desktop computers.

All the servers for the company are located in the main office. The branch office connects to the main office by using a VPN over a DSL connection to the main office. You need to minimize the bandwidth used to deploy updates to branch office clients over the VPN connection. The solution must minimize costs.

- A. a pull-distribution point
- B. a cloud management gateway
- C. BranchCache
- D. a cloud-based distribution point
- E. a software update point

Correct Answer: C
