**QUESTION 1**

You have a deployment of System Center Configuration Manager (Current Branch) that you use to manage devices on the corporate network.

You need to ensure that you can deploy software to Configuration Manager clients on the Internet.

What should you deploy?

- A. a cloud-based distribution point in Microsoft Azure and the Microsoft Operations Management Suite (OMS) connector
- B. a management point and a service connection point in a perimeter network.
- C. a cloud-based distribution point and a cloud management gateway in Microsoft Azure
- D. a cloud-based distribution point in Microsoft Azure and a Microsoft Intune subscription
- E. a distribution point and a management point on a perimeter network
- F. a management point on a perimeter network and a cloud management gateway in Microsoft Azure

Correct Answer: B

QUESTION 2

Your network contains an on-premises Active Directory domain named adatum.com. The domain contains a deployment of System Configuration Manager (Current Branch).

You create a Microsoft Azure subscription, and then you add an Azure Active Directory (Azure AD) tenant.

You are implementing Upgrade Readiness.

You need to configure the Upgrade Readiness connector in Configuration Manager.

What should you use for the Azure AD tenant name?

- A. adatum.onmicrosoft.com
- B. adatum.microsoft.com
- C. adatum.azure.com
- D. adatum.cloudapp.net

Correct Answer: A

QUESTION 3

You have a deployment of System Center Configuration Manager (Current Branch).

You need to identify computers that have a specific registry value set in the registry.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions		Answer Area
Deploy a package to a collection.		
Create a configuration baseline.		
Create a configuration item and add an assembly.	➤	⬆
Create a package.	⬅	⬇
Deploy a configuration baseline to a collection.		
Create a compliance policy.		
Create a configuration item that has a registry value and a compliance rule.		

Correct Answer:

Actions		Answer Area
Deploy a package to a collection.		Create a configuration baseline.
Create a configuration item and add an assembly.	➤	Create a configuration item that has a registry value and a compliance rule.
Create a package.	⬅	Deploy a configuration baseline to a collection.
Create a compliance policy.		

QUESTION 4

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario.

You work for a company named ADatum Corporation.

The ADatum network contains an Active Directory domain named adatum.com.

You have a partner company named Contoso, Ltd. The Contoso network contains an Active Directory domain named adatum.com.

All the client computers at both companies run Windows 10.

Each company has a deployment of System Center Configuration Manager (Current Branch).

ADatum has sales and IT departments. ADatum has a collection for each department.

Contoso has research, marketing, and human resources (HR) departments. Contoso has a collection for each department.

ADatum purchases Contoso.

You configure on-premises mobile device management (MDM) in adatum.com. You enroll the client computers in the IT department into on-premises MDM.

You configure hybrid MDM in contoso.com.

End of repeated scenario.

You need to enroll the computers of the managers into MDM.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Instruct the managers to run the Add-Computer cmdlet.
- B. Distribute a provisioning package to the managers. Instruct the managers to run the provisioning package.
- C. Instruct the managers to use the Settings app to connect to a work or school account.
- D. Instruct the managers to modify the network ID from the System settings.

Correct Answer: BC

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You plan to deploy System Center Configuration Manager (Current Branch) by using an initial pilot deployment.

The pilot deployment will contain five computers that run Windows 10.

You need to deploy the Configuration Manager client to the five computers only.

Solution: From each client, you run ccmsetup.exe.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A
