**QUESTION 1**

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You are building a new image of Windows 10.

You have a network share that contains the driver files. Each driver is comprised of an INF file and several DLL files.

You need to add the drivers to computers that are installed by using the Windows 10 image. You must achieve the goal without adding the drivers to the image.

What should you do?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Correct Answer: D

QUESTION 2

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You install Windows 10 on several devices.

You need to add a trusted root certificate to the devices. You must achieve the goal without reinstalling Windows 10.

What should you do?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.

- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Correct Answer: F

QUESTION 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a computer named Computer1 that runs Windows 10. Computer1 has the Windows Assessment and Deployment Kit (Windows ADK) installed.

You create the working directories for the customization of a Windows Preinstallation Environment (Windows PE) image.

You need to modify the regional setting used in Windows PE.

What should you do first?

- A. Mount the Install.wim file.
- B. Mount the Boot.wim file.
- C. Modify the Winpeshl.ini file.
- D. Create an answer file.
- E. Modify the Windows.ini file.
- F. Create a provisioning package.
- G. Load a catalog file (.clg).
- H. Create a cabinet file (.cab).

Correct Answer: B

QUESTION 4

You have an image of Windows 10 named Image1.wim. Image1.wim contains a Windows Recovery Environment (Windows RE) image.

You need to add a driver to Windows RE.

Which tool or cmdlet should you use?

- A. Windows Imaging and Configuration Designer (Windows ICD)
- B. Windows System Image Manager (Windows SIM)
- C. dism.exe
- D. Add-AppxProvisionedPackage

Correct Answer: C
