QUESTION 1

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are planning the deployment of DNS to a new network.

You have four internal DNS servers configured as shown in the following table.

Name	Location	IP address	DNS zone
Server1	Montreal	10.0.1.10	Contoso.com
Server2	Toronto	10.0.2.10	East.contoso.com
Server3	Seattle	10.0.3.10	West.contoso.com

The contoso.com zone contains zone delegations for east.contoso.com, west.contoso.com, and south.contoso.com. All the DNS servers use root hints.

You need to ensure that all the DNS servers can resolve the names of all the internal namespaces and internet hosts.

Solution: On Server2, you create a conditional forwarder for contoso.com and west.contoso.com. On Server3, you create a conditional forwarder for contoso.com and east.contoso.com.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 2

Which mode is being described below?

Deploy the RAS Gateway as an edge VPN server, an edge DirectAccess server, or both simultaneously.

In this configuration, RAS Gateway provides remote employees with connectivity to your network by using either VPN or DirectAccess connections.

A. Multitenant mode

B. Single tenant mode

Correct Answer: B

QUESTION 3

Your network contains an Active Directory domain named contoso.com. The domain contains a domain-based Distributed File System (DFS) namespace named Namespace1 that has access-based enumeration enabled. Namespace1 has a folder named folder1. Folder1 has a target of \\Server1\Folder1.

The permissions for folder1 are configured as shown in the following table.

Account name	Permission type	Permission
User1	NTFS	None
User1	Share	Change
User1	DFS	Read
User2	NTFS	Read
User2	Share	Full control
User2	DFS	None

Access-based enumeration is disabled for the share of Folder1.

You need to ensure that both User1 and User2 can see Folder1 when they access \\Contoso.com\NameSpace1.

What should you do?

A. Assign User2 the read DFS permission to Folder1.

B. Assign User1 the read NTFS permission to Folder1

C. Run the Set-DfsnFolderTarget cmdlet.

D. Assign User1 the read Share permission to Folder1

Correct Answer: A

---

QUESTION 4

You have a server named Host1 that runs Windows Server 2016.

You configure Host1 as a virtualization host and create 20 new virtual machines on Host1.

You need to ensure that all of the virtual machines can connect to the Internet through Host1.

Which three actions should you perform? Each correct answer presents part of the solution.

A. On a virtual machine, install the Remote Access server role.

B. From the properties of each virtual machine, enable virtual LAN identification.

C. From the properties of each virtual machine, connect to the virtual machine switch.

D. On Host1, configure the network address translation (NAT) network.

E. On Host1, create an internal virtual machine switch and specify an IP address for the switch.

Correct Answer: CDE

QUESTION 5

You have an application named App1. App1 is distributed to multiple Hyper-V virtual machines in a multitenant environment.

You need to ensure that the traffic is distributed evenly among the virtual machines that host App1.

What should you include in the environment?

A. Network Controller and Windows Server Network Load Balancing (NLB) nodes

B. an RAS Gateway and Windows Server Software Load Balancing (SLB) nodes

C. an RAS Gateway and Windows Server Network Load Balancing (NLB) nodes

D. Network Controller and Windows Server Software Load Balancing (SLB) nodes

Correct Answer: B
