QUESTION 1

DRAG DROP

You have a Microsoft Azure SQL data warehouse.

Users discover that reports running in the data warehouse take longer than expected to complete.

You need to review the duration of the queries and which users are running the queries currently.

Which dynamic management view should you review for each requirement? To answer, drag the appropriate dynamic management views to the correct requirements. Each dynamic management view may be used once, more than once, or

not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Dynamic Management Views	Answer Area
<input type="text" value="Sys.dm_pdw_exec_requests"/>	Duration of the queries: <input type="text" value="Dynamic Management Views"/>
<input type="text" value="Sys.dm_pdw_exec_sessions"/>	Which users are running queries currently: <input type="text" value="Dynamic Management Views"/>
<input type="text" value="Sys.dm_pdw_os_threads"/>	
<input type="text" value="Sys.dm_pdw_request_steps"/>	

Correct Answer:

Dynamic Management Views	Answer Area
<input type="text"/>	Duration of the queries: <input type="text" value="Sys.dm_pdw_exec_requests"/>
<input type="text"/>	Which users are running queries currently: <input type="text" value="Sys.dm_pdw_exec_sessions"/>
<input type="text" value="Sys.dm_pdw_os_threads"/>	
<input type="text" value="Sys.dm_pdw_request_steps"/>

QUESTION 2

You plan to use Microsoft Azure Event Hubs to ingest sensor data. You plan to use Azure Stream Analytics to analyze the data in real time and to send the output directly to Azure Data Lake Store.

You need to write events to the Data Lake Store in batches.

What should you use?

- A. Apache Storm in Azure HDInsight
- B. Stream Analytics
- C. Microsoft SQL Server Integration Services (SSIS)
- D. the Azure CLI

Correct Answer: B

QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are monitoring user queries to a Microsoft Azure SQL data warehouse that has six compute nodes.

You discover that compute node utilization is uneven. The `rows_processed` column from `sys.dm_pdw_workers` shows a significant variation in the number of rows being moved among the distributions for the same table for the same query.

You need to ensure that the load is distributed evenly across the compute nodes.

Solution: You add a nonclustered columnstore index. Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 4

HOTSPOT

You have a Microsoft Azure Data Lake Analytics service.

You have a tab-delimited file named `UserActivity.tsv` that contains logs of user sessions.

The file does not have a header row.

You need to create a table and to load the logs to the table. The solution must distribute the data by a column named `SessionId`.

How should you complete the U-SQL statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

```
CREATE TABLE dbo.UserActivity
(
  INDEX s_idx CLUSTERED (SessionId ASC)
  DISTRIBUTED BY  (SessionId) INTO 2
    HASH
    RANGE
    ROUND ROBIN
)
EXTRACT SessionId Guid
, Timestamp DateTime
, Geocode string
, ResourcePath string
, ExecutionTime decimal
, HeaderLog string
FROM "/data/UserActivity.tsv"
USING 
;
```

Correct Answer:

Answer Area

```
CREATE TABLE dbo.UserActivity
(
  INDEX s_idx CLUSTERED (SessionId ASC)
  DISTRIBUTED BY [ ] (SessionId) INTO 2
  )
EXTRACT SessionId Guid
, Timestamp DateTime
, Geocode string
, ResourcePath string
, ExecutionTime decimal
, HeaderLog string
FROM "/data/UserActivity.tsv"
USING [ ]
;
```

QUESTION 5

You have an on-premises Microsoft SQL Server instance.

You plan to copy a table from the instance to a Microsoft Azure Storage account.

You need to ensure that you can copy the table by using Azure Data Factory.

Which service should you deploy?

- A. an on-premises data gateway
- B. Azure Application Gateway
- C. Data Management Gateway
- D. a virtual network gateway
