**QUESTION 1**

Which two permissions can Office 365 external users have for a Microsoft SharePoint Online site? (Each correct answer presents a complete solution. Choose two.)

- A. Viewer
- B. Owner
- C. Member
- D. Visitor

Correct Answer: AC

QUESTION 2

Your company has an intranet site that is hosted on Microsoft SharePoint Online. The site is currently available in English only. You need to ensure that users can navigate the intranet site in English and in Spanish. What should you do?

- A. Change the Regional settings of the intranet site.
- B. Activate the SharePoint Server Enterprise Site Collection features.
- C. Change the Language settings of the intranet site.
- D. Change the Working Languages in the term store.

Correct Answer: D

QUESTION 3

Your company has an Office 365 E3 Plan subscription. You need to recover a previous Microsoft Lync conversation. Which two actions could you perform to achieve this goal? (Each correct answer presents a complete solution. Choose two.)

- A. In Microsoft Outlook, recover the conversation from the Conversation History folder.
- B. From the Lync Online Control Panel, recover the previous conversations.
- C. From the Lync Online Control Panel, recover the conversation logs.
- D. On the Lync Options menu, click Tools, and then click View Conversation History,

Correct Answer: AD

QUESTION 4

You need to display a list of all the mail-enabled users in your Microsoft Exchange Online environment. Which two actions can you perform to achieve this goal? (Each correct answer presents a complete solution. Choose two.)

- A. Run the Get-Mailbox Windows PowerShell cmdlet.
- B. Run the List-Mailbox Windows PowerShell cmdlet.
- C. In Microsoft Outlook, display the Global Address List.
- D. In the Exchange Online Control Panel, display the mailboxes.

Correct Answer: AC

The Get-Mailbox cmdlet retrieves the attributes and objects for a mailbox. No parameters are required. If the cmdlet is used without a parameter, all mailboxes in the organization are listed. In MS Outlook the Global Address List contains the names and e-mail addresses of everyone in your organization. The Microsoft Exchange Server administrator creates and maintains this address book.
