QUESTION 1

You create and deploy an image to a reference computer.

You plan to deploy the image to several client computers.

You need to meet the following requirements for the planned deployment:

Remove all of the unique system information from the image. Display the Windows Welcome screen the first time a new computer starts.

Which command should you run?

- A. sysprep /audit /generalize /reboot
- B. sysprep /oobe /generalize /shutdown
- C. sysprep /audit /oobe /generalize
- D. sysprep /generalize /quiet /reboot

Correct Answer: B

QUESTION 2

You have a Windows 8 image that is configured to start to the Windows Welcome screen.

You need to ensure that the image starts in audit mode. You mount the image.

What should you do next?

- A. Create an answer file named Audit.xml. Copy the answer file to the Windows\Panther\Unattend folder in the image.
- B. Create an answer file named Unattend.xml. Copy the answer file to the Windows\Panther\Unattend folder in the image.
- C. Create an answer file named Unattend.txt. Copy the answer file to the Windows folder in the image.
- D. Create an answer file named audit.txt. Copy the answer file to the Windows folder in the image.

Correct Answer: A

QUESTION 3

You have a Windows 8 image.

You plan to deploy the image to several client computers. The client computers will be delivered to several different customers.

You plan to provide all of the customers with the ability to perform a push-button reset of their computers from recovery media. The push-button reset will include a script that will repartition the hard disk drives automatically.

You need to identify which encoding format must be used for the script file.

Which encoding format should you identify?

- A. Unicode
- B. BigEndianUnicode
- C. ANSI
- D. UTF-8

Correct Answer: D

QUESTION 4

You have a WIM file named Install.wim that contains two images.

You need to apply the second image to a computer.

What are two possible commands that you can use to apply the image? (Each correct answer presents a complete solution. Choose two.)

- A. dism.exe
- B. wdsutil.exe
- C. imagex.exe
- D. sysprep.exe

Correct Answer: AC

QUESTION 5

Your company's deployment environment contains the following: One subnet One Active Directory domain Two servers that run Windows Server 2012

You need to recommend a solution to deploy an image to at least 100 client computers simultaneously.

The solution must start deploying the image automatically when 20 client computers are available to receive the image.

What should you include in the recommendation?

- A. The Multipath I/O (MPIO) feature and the File Server role

- B. The Windows Deployment Services server role that contains a Scheduled-Cast transmission
- C. The Windows Deployment Services server role that contains an Auto-Cast transmission
- D. The Scale-Out File Server for application data role and the Reliable Multicast Protocol

Correct Answer: B
