**QUESTION 1**

When a client's DHCP-issued address expires, the client will:

- A. Select a new address and request approval from the DHCP server.
- B. Require manual configuration with a static IP address.
- C. Attempt to obtain a new address by broadcasting.
- D. Continue to use the address until it is notified to stop.

Correct Answer: C

Rebinding would occur.

Rebinding

If the DHCP client is unable to communicate with the DHCP server from which it obtained its lease, and 87.5 percent of its lease time has expired, it will attempt to contact any available DHCP server by broadcasting DHCPRequest messages.

Any DHCP server can respond with a DHCPAck message, renewing the lease, or a DHCPNak message, forcing the DHCP client to initialize and restart the lease process.

Note:

Renewing

IP addressing information is leased to a client, and the client is responsible for renewing the lease. By default, DHCP clients try to renew their lease when 50 percent of the lease time has expired. To renew its lease, a DHCP client sends a

DHCPRequest message to the DHCP server from which it originally obtained the lease.

Reference: DHCP Client States in the Lease Process

QUESTION 2

The host name of the fully qualified domain name (FQDN) mail.exchange.corp.nwtraders.com is:

- A. corp
- B. com
- C. nwtraders
- D. exchange
- E. mail

Correct Answer: E

Hostnames are composed of series of labels concatenated with dots, as are all domain names. For example, let's break mail.google.com into its component parts:

mail is the host or local hostname; and google.com is the domain or parent domain name.

QUESTION 3

Two companies want to share data by using the Internet. Which type of network provides the solution?

- A. Ethernet
- B. Intranet
- C. Extranet
- D. Perimeter

Correct Answer: C

An extranet is a computer network that allows controlled access from outside of an organization's intranet. Extranets are used for specific use cases including business-to-business (B2B).

QUESTION 4

What is the bit rate for a North American T3 circuit?

- A. 6.312 Mbit/s
- B. 44.736 Mbit/s
- C. 274.176 Mbit/s
- D. 400.352 Mbit/s

Correct Answer: B

Data Rates. DS3/T3 = 44.7 Mbps

QUESTION 5

Match the IPv4 address type to the corresponding definition.

To answer, drag the appropriate definition from the column on the left to the address type on the right. Each definition may be used once, more than once, or not at all. Each correct match is worth one point.

Select and Place:

Definitions	Answer Area
assigned to a single network interface located on a specific subnet on the network and used for one-to-one communications	Multicast Definition
assigned to the variable portion of an IPv4 address that is used to identify a network node's interface on a subnet	Broadcast Definition
assigned to one or more network interfaces located on various subnets on the network and used for one-to-many communications	Unicast Definition
assigned to all network interface located on a subnet on the network and used for one-to-everyone-on-a-subnet communications	

Correct Answer:

Definitions	Answer Area
	Multicast assigned to one or more network interfaces located on various subnets on the network and used for one-to-many communications
assigned to the variable portion of an IPv4 address that is used to identify a network node's interface on a subnet	Broadcast assigned to all network interface located on a subnet on the network and used for one-to-everyone-on-a-subnet communications
	Unicast assigned to a single network interface located on a specific subnet on the network and used for one-to-one communications
