#### QUESTION 1

In AEM 5.6 and above, which two scenarios require that the Sling Referrer Filter's default configuration be changed? (Choose two.)

- A. A JavaScript widget on an external website will be posting comments to an AEM page.
- B. Automated scripts, using the curl command, will be executing HTTP PUT requests.
- C. The SAML Authentication Handler is used to authenticate users.
- D. The system host name does not match the external DNS name.

Correct Answer: AC

---

#### QUESTION 2

A client acquires multiple companies that operate autonomously and want to use AEM to host all of their websites.

How should the author users be grouped?

- A. Company-specific groups for workflow approval steps and general groups for content editing
- B. General groups for workflow approval and content editing
- C. Separate company-specific groups for both content editing and workflow approval steps
- D. Default AEM groups for workflow approval and company-specific groups for content editing

Correct Answer: C

---

#### QUESTION 3

An architect must use metrics from a client's existing CMS environments. Which metric is LEAST valuable?

- A. CMS storage requirements
- B. Average daily requests of users visiting the site
- C. CPU clock speed of the servers
- D. Percentage of requests offloaded by the CDN

Correct Answer: A

---

#### QUESTION 4

An architect must incorporate measures to prevent content grabbing. Which two recommendations should the architect configure? (Choose two.)

- A. Apache Sling POST Servlet
- B. Apache Sling GET Servlet
- C. Dispatcher filter section
- D. Dispatcher allowed Clients section

Correct Answer: BC

---

#### QUESTION 5

During a discovery workshop, a content editor must be able to publish any page for English and French versions of the website. The architect could put the extra permission against only the specific user profile. Instead, the architect creates a group, sets the group's permissions, then the replicates permissions on the both content/en and content/fr nodes.

What is the likely reason for the architect's decision?

- A. Groups are easier to administer and manage user access rights.
- B. Groups provide greater granularity of control over users.
- C. Groups integrate into third-party security such as LDAP.
- D. Group privileges are stronger than user privileges.

Correct Answer: D
