QUESTION 1

When the server is in administration mode, which users are NOT allowed to connect?

- A. informix
- B. Members of the DBSA group
- C. Members of the DBSSO group
- D. Users specified by ADMIN_MODE_USERS

Correct Answer: C

QUESTION 2

When executing the following command: `execute function sysadmin task("table compress", "customer")` what will happen to the customer table?

- A. Only newly added rows will be compressed.
- B. Only existing data will be compressed, new data will remain uncompressed.
- C. Row data and partition blobs will be compressed and any free table space will be released.
- D. Row data and partition blobs will be compressed and the space allocated to the table will remain.

Correct Answer: C

QUESTION 3

Which statement about DataBlade modules is true?

- A. All DataBlades located in the `$INFORMIXDIR/extend` are automatically registered.
- B. All built-in extensions are automatically registered when the extension is first accessed.
- C. All built-in extensions are automatically registered each time the database server is started.
- D. All built-in extensions are automatically registered when the database server is first initialized.

Correct Answer: B

QUESTION 4

In an organization, all employees are authenticated via domain wide Kerberos single sign-on. The DBSA wants to provide access to the database server for an employee without requesting the Operating System (OS) administrator to create a OS level user account. Which Informix feature does the DBSA need to leverage?

- A. Mapped users
- B. Role based users
- C. Table level access for users
- D. Label based access for users

Correct Answer: A

QUESTION 5

For a query to be processed by the accelerator, the query or query block should meet the certain criteria. Which statement is FALSE?

- A. The query or query block must include at least 2 fact tables.
- B. The query or query block must refer to a subset of the tables in the AQT.
- C. The scalar and aggregate functions in the query or query block must be supported by the Informix Warehouse Accelerator.
- D. The table references or joins specified in the query or query block must be the same as the references in the data mart definition.

Correct Answer: A
