QUESTION 1

A recent strategic corporate directive is demanding a decrease in the operational budget of a cargo airline by 2%. The CIO has indicated a shift to SOA can help gain efficiencies in development costs. The company has just signed a partnership with a package delivery company that requires integration between the systems of the two companies. When preparing for SOA adoption, what is most important to document to show Return on Investment (ROI) from the shift to SOA?

- A. The current operational budget for the company and the partner company
- B. The current IT governance overlap between the company and the partner company
- C. The current Key Performance Indicators (KPIs) for the company and the partner company
- D. The estimated cost for point-to-point integration with the partner company using the current messaging system

Correct Answer: D

QUESTION 2

Why is messaging important to an SOA?

- A. Messaging improves the performance of complex environments.
- B. Messaging implements separation of concerns resulting in faster development.
- C. Messaging facilitates communication between distributed heterogeneous environments.
- D. Messaging is used to communicate between a repository and an Enterprise Service Bus (ESB).

Correct Answer: C

QUESTION 3

Which statement is true about a business process in the context of Business Process Management (BPM)?

- A. It should be monitored.
- B. It only deals with automated tasks.
- C. It interacts with a single application.
- D. It has one primary Key Performance Indicator (KPI).

Correct Answer: A

QUESTION 4

Which statement describes the importance of SOA governance?

- A. It provides a tool for controlling the distribution of Web services for a line of business.
- B. It eliminates the risk in migrating a business from standard integration mechanisms to SOA.
- C. It creates a clearly articulated decision framework for designing, implementing and managing SOA services.
- D. It provides a mechanism for the lines of business to provide input to IT staff for the design of services.

Correct Answer: C

QUESTION 5

What is contained in an SOA repository as opposed to a registry?

- A. Service policy information
- B. Versions of software components
- C. Uncommitted transactions to enable compensation handling
- D. Service endpoint information to facilitate dynamic binding at runtime

Correct Answer: A
