QUESTION 1

A BPM analyst is designing a process in the Process Diagram View, and realizes the process must account for a technical exception following an activity. What symbol in the BlueWorks Live needs to be used for this technical exception?

A.

B.

C.

D.

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: B

**QUESTION 2**

A cable company is improving a process in their call center for requesting cable service. The new process will run in IBM Business Process Manager V7.5.1. The call center supervisor would like to know how long it takes the customer service representatives to take the customer requests before passing the request to the engineering department to provide the service. What should the BPM analyst recommend to address the measurement reporting requirement?

- A. Use the My Performance scoreboard with Provide Cable Service filter.
- B. Use the My Team Performance scoreboard with the Take customer service request.
- C. Use IBM Business Monitor to create a custom report with events from the engineering department database.
- D. Create a custom report with tracking points in the process with cable service customer names.

Correct Answer: B

QUESTION 3

A security company provides background checks on individuals as a service. Based on various criteria, a customer's request can have a different priority to receive a better level of service response time. Whether the background check passes or fails should not impact the service level. Requests with a high priority need to be addressed within the same business day, those with a medium priority can take up to 3 days to process, and those with a low priority must be responded to within 5 business days. The security company is currently updating the background check process and wants to define some performance measurements to ensure customers are receiving the service level they are paying for. How should the BPM analyst define the measurements to meet these requirements?

- A. Calculate the rate of background check passes per day per priority to determine the service level agreement.
- B. Count the number of background check failures for each priority and calculate the difference from the service level agreement.
- C. Capture the times to start and complete the background check, calculate the duration and compare it to the service level agreement by priority.
- D. Capture the times to start and complete the background check, calculate the service level agreement for each priority and compare it to the times.

Correct Answer: C

QUESTION 4

During Playback 0, a business user asks the following question: "Once a task is assigned to a user, can the task be reassigned to another user?" Which of the following responses is a valid response by a BPM analyst?

- A. No, assignment must be built into the system.
- B. No, once a task is assigned to a user the task must be completed by the user.

- C. Yes, a user can reassign their task to any other user.
- D. Yes, reassignment is possible dependant upon the role of the user.

Correct Answer: D

QUESTION 5

A BPM analyst is creating a process model for requesting a renovation permit. The BPM analyst is using the following description of the first activity:

"One of our municipal office clerks receives a paper permit application from the local resident, an applicant. The clerk first looks up the resident's name and address in our system, then enters the information from the paper application into the

system, and assigns a temporary permit number to the application. When the application entry is complete, the clerk sends it to a manager to assign it to an adjudicator."

Which name should the BPM analyst use for the first task that accurately describes the activity and follows recommended naming conventions?

- A. Application Entry
- B. Create Application
- C. Clerk Receive and Enter Application
- D. Lookup name, create application, assign number, and send it to the manager

Correct Answer: B
