QUESTION 1

Which function returns an archived copy of a file to the client system?

A. recall

B. return

C. restore

D. retrieve

Correct Answer: D

QUESTION 2

A company writes a Service level Agreement (SLA) for their backup customers. This is a description of the default service level:

-All files backed up from the client node are governed by the "standard" management class.

- The current version, and up to two (2) previous versions, of a file will be kept in data storage when the file exists on the client node.

-If the file no longer exists on the client node, it and its two (2) previous versions remain in data storage.

-Deleted and previous versions will be retained for at least 30 days.

Which command conforms to the company\\'s SLA?

A. define copygroup standard standard standard verexist=30 verdel=3 retex=3 reto=30

B. define copygroup standard standard standard verexist=30 verdel=30 retex=3 reto=3

C. define copygroup standard standard standard verexist=2 verdel=3 retex=30 reto=30

D. define copygroup standard standard standard verexist=3 verdel=3 retex=30 reto=30

Correct Answer: D

A. /tsm/db2/db2setup.log

B. /tsm/logs/db2setup.log

C. /coi/plan/tmp/db2setup.log

D. /coi/plan/uninstall/db2setup.log

Correct Answer: C

QUESTION 4

Which three database benefits apply to the IBM DB2 database included in IBM Tivoli Storage Manager V6.3? (Choose three.)

A. Larger database capacity

B. Automatic database audits

C. Automatic database mirroring

D. Automatic database reorganization

E. Automatic definition for dbbackup trigger

F. Eliminates the need for database incremental backups

Correct Answer: ABD

QUESTION 5

An IBM Tivoli Storage Manager (TSM) administrator has set up and enabled Disaster Recovery Manager. The administrator wants to return tapes that are empty from the vault to the library as scratch. The administrator issues the command:

move drmedia * wherestate=vaultretrieve

None of the tapes that were in value retrieve state have been returned to scratch even though they have been placed back in the library. What caused this to happen?

A. The tapes are in COURERRETREVE state and must be moved to MOUNTABLE state.

B. The tapes are in VAULTRETRIEVE state and must be moved to COURERRETREVE state.

C. The tapes are in COURERRETREVE state and must be moved to NOTMOUNTABLE state.

D. The tapes are in COURERRETREVE state and must be moved to ONSITERETREVE state.

Correct Answer: D
