**QUESTION 1**

Some incoming fact data has invalid product codes. The developer wants to accept this fact data and assign the necessary surrogate keys in the dimension table. What can be done to accomplish this?

- A. Accept unmatched member identifiers in the measure element properties.
- B. Modify the SQL for the reference structure to exclude the missing product codes.
- C. Accept unmatched member identifiers in the dimension element properties and save unmatched member details via reference structure.
- D. Add a derived dimension element to the fact build to store the missing product codes and unsubscribe the element from the delivery module.

Correct Answer: C

QUESTION 2

When executing a fact build, a developer wants to estimate the amount of input resources that the build will require, but does not want to deliver any data. What execution mode should be selected?

- A. Test
- B. Check Only
- C. Object Creation
- D. Preproduction

Correct Answer: B

QUESTION 3

Which of the following is true of conformed dimensions? (choose two)

- A. Conformed dimensions are created using the Fact Build wizard.
- B. A conformed dimension uses surrogate keys.
- C. A conformed dimension is specific to a single fact table.
- D. Conformed dimensions are created using the Hierarchy wizard.
- E. A conformed dimension is used by multiple fact tables.

Correct Answer: BE

QUESTION 4

A DataStream includes two different data sources: "Golf Equipment" and "Other Equipment." For each incoming row, the developer wants to add a value that indicates the data source that the row comes from. What should the developer do?

- A. Create a static member for each data source in the underlying hierarchy.
- B. Add a literal to each data source that references the data source name.
- C. Specify the source identity property for each data source in the DataStream.
- D. Add a derivation to the transformation model to create a new column.

Correct Answer: B

QUESTION 5

An Employee hierarchy has been created using the Hierarchy wizard. However, employee names now need to be included in the hierarchy. What should be done?

- A. Select the hierarchy and rerun the Hierarchy wizard to add an attribute to it.
- B. Manually add the Employee Name attribute to the template and to the hierarchy.
- C. Add a derivation to the dimension build to include Employee Name.
- D. Create another dimension build to populate the hierarchy with an Employee Name attribute.

Correct Answer: B
