QUESTION 1

James would like to display metadata from a federated document. What tag should he use to reference the title of the document?

- A. [Placeholder name="title"]
- B. [Property field="title" context="current" type="federated"]
- C. [AttributeResource attributeName="title"]
- D. [Element key="title" context="current" type="federated"]

Correct Answer: C

QUESTION 2

Franklin is an IBM Web Content Manager administrator for his company. His company has another content management system where content authoring is done. They have a custom application that provides the update as an RSS feed that can be consumed by IBM WebSphere Portal server - Web Content Integration to consume and then render contents from WebSphere Portal server. The feed contains many embedded links to images using the image tag. Franklin wants these images to be saved as image components and the reference updated when the content is created.

What configuration changes are required to enable automatic image tag processing?

- A. Edit the `disable.img.proc` setting in the `WCMConsumerPlugin.properties` file, set it to "false," and restart the WebSphere Portal server.
- B. Edit the `enable.img.proc` setting in the `WCMConsumerPlugin.properties` file, set it to "true," and restart the WebSphere Portal server.
- C. Edit the `process.img.tag` setting in the `WCMConsumerPlugin.properties` file, set it to "true," and restart the WebSphere Portal server.
- D. Edit the `process.img.tag` setting in the `WCMConsumerPlugin.properties` file, set it to "enabled," and restart the WebSphere Portal server.

Correct Answer: A

QUESTION 3

All of the following examples can be used to retrieve an IBM WebContent Manager workspace item except:

- A. `webContentService.getRepository().getWorkspace((Principal) portletRequest.getUser());`
- B. `webContentService.getRepository().getSystemWorkspace();`

C. `webContentService.getRepository().getWorkspace("my username", "my password");`

D. `webContentService.getRepository().getSystemWorkspace("my username", "my password");`

Correct Answer: D

QUESTION 4

Frank has created a workflow consisting of draft, review, published, and expired stages. In order to have a content item automatically move from the published stage to the expired stage when the expiration date has reached, what should Frank do?

A. Add a "scheduled move" workflow action for items "entering" the expiration stage and associate the action with the content item's expiration date.

B. Add a "scheduled move" workflow action for items "entering" the publish stage and associate the action with the content item's expiration date.

C. Add an "expiration" action for items "leaving" the publish stage and associate the action with the content item's expiration date.

D. Add a "scheduled move" workflow action for items "leaving" the publish stage and associate the action with the content item's expiration date.

Correct Answer: B

QUESTION 5
