QUESTION 1

When preparing to deploy a system using Deployment Manager, which one of the following files contains the list of assets to be exported?

- A. Half map.
- B. Export dataset.
- C. Export manifest.
- D. Deployment dataset.

Correct Answer: C

QUESTION 2

The legal department in a company requires the use of data backup. One option that is presented is the use of an online backup.

When considering the IBM FileNet P8 environment, what components do NOT support the use of online backup?

- A. IBM FileNet Workplace XT and Workplace
- B. IBM Content Navigator and IBM FileNet Workplace XT
- C. IBM Content Search Services and IBM Content Navigator
- D. IBM FileNet Rendition Engine and IBM FileNet Case Analyzer

Correct Answer: D

The following FileNet P8 components do not support online backups. The data associated with these components can optionally be included in your online backup snapshot by stopping the component services before performing the snapshot and restarting after the snapshot is completed. QUESTION 3

A company is building a solution and wants to restrict the properties to a discrete set of possible values defined by the design of the application.

What type of object represents the discrete set of possible values that a property object can hold?

- A. Pick list
- B. Choice list
- C. Access control list

D. Controlled value list

Correct Answer: B

A ChoiceList object representing a set of allowable values. If it is associated with a property, ChoiceValues provides a discrete set of possible values that the property can hold. Otherwise, if a ChoiceValues is associated with a Choice object, it defines the set of possible values in a choice list group.

QUESTION 4

Component Manager hosts a component that can be used to execute certain content- related operations against the Content Engine. What is this component called?

- A. Event action.
- B. CEOperations.
- C. Integration Tier.
- D. Web Application Toolkit.

Correct Answer: B

QUESTION 5

What P8 domain level entity allows specific meta data attributes to be identified that control the effective access of an object in conjunction with the object's Access Control List (ACL)?

- A. Marking sets.
- B. Storage area.
- C. Add-on feature.
- D. Security inheritance.

Correct Answer: A
