- A. Waiting, Ready, Working, Complete, Failed
- B. Waiting, Ready, In Process, Complete, Failed
- C. Waiting, Ready, Working, Complete, Failed, Archived
- D. Waiting, Ready, Working, Complete, Failed, or user defined state

Correct Answer: A

---

**QUESTION 2**

Which of the following is NOT a difference between a development and production Case Manager environment?

- A. Solutions may be modified in the development environment and should not be modified in the production environment
- B. Production Case Manager environments can take advantage of P8 distributed deployment and domain partitioning configuration options while development cannot
- C. In a development environment there must be a design object store and a target object store, in a production environment only one or more target object stores is required
- D. In a development environment, Case Manager Builder is used to deploy solutions. In a production environment, Case Manager Administration Client is used to deploy solutions

Correct Answer: C

---

**QUESTION 3**

What Content Management Interoperability Services (CMIS) extensions allow solutions to use additional P8 content capabilities?

- A. Hidden properties, text search, GZIP
- B. Hidden properties, text search, rendition
- C. Domain name, Records Management, file object
- D. Text search, Records Management, Policy Services

Correct Answer: A

---

**QUESTION 4**

How are complex data flows requiring complex data structures between backend systems integrated into IBM Case Manager?

- A. You can define complex business objects in Case Builder to provide complex data flows between web services within any process fragment
- B. Complex interactions between Service Oriented Architecture (SOA) components are modeled in WebSphere Integration Developer and then mapped to a task in an IBM Case Manager solution
- C. Case Builder and the P8 Process Designer support round tripping in order to define how Tasks map to SOA services by using industry standard Service Component Architecture (SCA) bindings
- D. The P8 Process Designer has been enhanced to provide complex data mediation and business object mapping capabilities when orchestrating transactions amongst backend systems via web services

Correct Answer: B

---

#### QUESTION 5

Which statement is correct in regards to the use of Cognos Business Intelligence (BI) under the IBM Case Manager license?

- A. Unrestricted use of Cognos BI is allowed
- B. Cognos BI can only be used to deliver Case Analyzer reports
- C. Cognos BI can be used to deliver reports from any Case Manager data source
- D. Cognos BI is not covered under the Case Manager license and must be purchased separately

Correct Answer: D
