**QUESTION 1**

What is used during Fast Recovery to return pages to the original state?

- A. Logical Log
- B. Physical Log
- C. External Tables
- D. TemporaryDBSpaces

Correct Answer: B

---

**QUESTION 2**

When executing the SQL Admin API "defragment table" and "table repack" commands on the customer table, what will happen to the table? (Choose two.)  
`executefunction sysadmin:task("defragment table","customer");`  
`executefunction sysadmin:task("table repack", "customer");`

- A. Fragments of a table will be combined.
- B. Rows will be moved to the beginning of table.
- C. Given sufficient resources the number of extents in the table will be reduced.
- D. Free space at the end of the table will be released to thedbspace for other tables to use.
- E. The table will be locked preventing inserts from happening for the duration of the commands.

Correct Answer: BC

---

**QUESTION 3**

If the DYNAMIC\_LOGS onconfig parameter is set to 1 and logical log backups are not occurring, what will happen in the instance when the last logical-log file fills?

- A. The instance suspends all processing until the next logical-log file is manually added.
- B. The database server will automatically execute a checkpoint and flush the oldest update to disk.
- C. The database server will make use of any logical-log file available regardless of whether the available file is in sequence or not.
- D. The database server will stop processing, then start an automatic backup of the logical-log file and resume normal processing once the automatic back up of the logical-log files is completed.

Correct Answer: A

---

**QUESTION 4**

Why do automatic checkpoints cause the database server to trigger more frequent checkpoints?

- A. To avoid LRU flushes.
- B. To ensure the buffer pool is always available.
- C. To ensure theostat -g ckp report is accurate.
- D. To avoid transaction blocking during checkpoints.

Correct Answer: D

---

**QUESTION 5**

Which statement is NOT true for interval fragmentation?

- A. A NULL fragment is allowed.
