QUESTION 1

The number of items displayed in the IBM Security Identity Manager (ISIM) Administrator Console has been updated to a value of 100 in the test environment. What are the two options below to update the Production environment? (Choose two)

A. Update the value using the system configuration tool. (runConfig)

B. Manually update the values in the SelfServiceUI.properties file

C. Update the value using the import/export feature in ISIM.

D. Manually update the value in the enRole.properties file.

E. Manually update the value in the ui.properties file.

Correct Answer: AB

QUESTION 2

Customer A is mining roles that reflect the employee population and their entitlements. As a design principle, which statement is TRUE in a role design for Company A?

A. Design hybrid roles, using a flag in the role definitions to convert static organizational roles to dynamic organizational roles and vice versa during steady state procedures.

B. Design only dynamic organizational roles, and ensure that person objects contain all the information needed to assign a person to a dynamic role automatically.

C. Design a mix of dynamic and static organizational roles, and encourage business processes to assign employees to static organizational roles.

D. Role design only needs to factor in groups of entitlements, since organizational roles are only used in provisioning policy membership.

Correct Answer: B

QUESTION 3

In a web SSO environment, what is a valid step in the deployment plan to achieve integration between ISIM and web SSO product for implementing Forgotten Password functionality?

A. ISIM\'s Forgotten Password function must get the challenge questions from the web SSO product and change ISIM service\'s password.

B. ISIM\'s Forgotten Password function will automatically bounce the request to web SSO product\'s Forgotten Password function.

C. The web SSO product\'s Forgotten Password function can get the challenge questions from ISIM.

D. The web SSO\'s forgotten password function cannot be used - only ISIM\'s forgotten password function must be

used.

Correct Answer: C
