QUESTION 1

What is a method for verifying the business success of an SOA solution?

- A. Pilot the solution and solicit feedback from stakeholders and subject matter experts.
- B. Implement appropriate Key Performance Indicators (KPIs) at multiple levels of the solution.
- C. Implement a technology think-tank integrated with the lines of business and with overall executive sponsorship.
- D. Implement a Center of Excellence (CoE) to provide a tight linkage with business to define services and operational characteristics at technical and business levels.

Correct Answer: B

QUESTION 2

Which requirement is fulfilled by dynamic management of services during the execution in SOA?

- A. Meeting Service Level Agreements (SLAs) for Gold customers
- B. Assigning premiere customers to the Gold customer status
- C. Identifying an incoming request as coming from a Gold customer
- D. Changing a business process to provide enhanced capabilities for Gold customers

Correct Answer: A

QUESTION 3

From an IT perspective, what are three goals of moving to SOA?

- A. Increasing the IT budget
- B. Implementing packaged applications
- C. Giving IT the maximum number of options to solve a business challenge or problem
- D. Exhibiting IT systems as evidence that the company is at the forefront of technology
- E. Viewing the operating environment as a set of services provided by the underlying IT infrastructure
- F. Improving Return on Investment (ROI) on IT assets by breaking traditional monolithic systems down into more manageable pieces

Correct Answer: CEF

QUESTION 4

Why is business and IT alignment so important to SOA?

- A. Applications can be rewritten to suit the needs of the business.
- B. It allows for a significant investment in technology and hardware.
- C. Business and IT can collectively fulfill the business needs and goals.
- D. Business and IT can decide which vendors to use and which business functions to outsource.

Correct Answer: C

QUESTION 5

Which two statements describe characteristics of SOA?

- A. Multiple business units host the same service to ensure maximum reuse and availability.
- B. Maximum reuse is achieved by ensuring services are generic so that the same service serves many different business tasks.
- C. Existing APIs are exposed over new technologies such as Web services and Enterprise Service Buses (ESB) to increase business flexibility and agility.
- D. Programming by contract ensures the service consumer can be unaware of the implementation details of the service provider facilitating loose coupling.
- E. Through layered abstraction over the implementation and runtime details, it is possible to provide software resources that give the right balance between reuse and specificity.

Correct Answer: DE
