QUESTION 1

To fully utilize CA SiteMinder password services, what do you need to utilize in the user directory store?

- A. Replication
- B. A read only account
- C. Access Control Lists (ACLs)
- D. An administrator account with read/write capabilities

Correct Answer: D

QUESTION 2

Which statement about the Credential Selector is TRUE?

- A. It eliminates the need for password policies to manage password rules.
- B. It is an add-on that cannot be used with all CA SiteMinder-protected applications.
- C. It is implemented as a stand-alone component for any CA SiteMinder-protected application.
- D. It chooses credential authentication schemes dynamically based on the type of resource being requested.

Correct Answer: C

QUESTION 3

When using the Windows authentication scheme, the users Windows security context is asserted by:

- A. The User Store
- B. The Web Agent
- C. Active Directory
- D. The IIS server through the Web Agent

Correct Answer: D

QUESTION 4

To configure local configuration for a Web Agent, you use AllowLocalConfig = yes. Where do you set this parameter?

- A. In the Host Configuration File
- B. In the Agent Configuration File

- C. In the Hosts file on the web server
- D. In the local configuration file on the system hosting the web server

Correct Answer: B

QUESTION 5

The Active Directory Global Catalog feature is useful in a multi-domain forest where it provides a central repository of domain information for the forest by storing partial replicas of all domain directory partitions. When integrating Active Directory with CA SiteMinder, which Global Catalog- related limitation do you need to consider?

- A. Load balancing and failover are not supported when you use Global Catalog.
- B. Password Services is not supported because Global Catalog does not support writes.
- C. A Policy Server cannot communicate with an Active Directory Global Catalog User Store.
- D. A Policy Server can communicate with an Active Directory Global Catalog User Store but cannot operate in Federal Information Processing Standards (FTPS) mode.

Correct Answer: B
