QUESTION 1

When you configure tenant-aware device discovery for the Shared Collection Model, which steps do you perform? (Choose three)

- A. Configure an IP domain for each tenant.
- B. Create an IP domain in the Default Space.
- C. Create service provider groups for each tenant.
- D. Create SNMP and discovery profiles for each tenant.
- E. Assign the relevant Data Collectors to the Default Tenant IP domain.

Correct Answer: BCE

QUESTION 2

To log into a specific server and uninstall a Data Collector, which account do you use?

- A. Root
- B. Admin
- C. IT Operator
- D. Any user with access to the server

Correct Answer: A

QUESTION 3

In which circumstance do you typically need to create a new metric family?

- A. Each time you create a new monitoring profile
- B. Each time you create a custom vendor certification
- C. When you need to monitor a new type of technology
- D. When you want to restrict what you monitor to maximize performance

Correct Answer: C

QUESTION 4

When you are planning Data Repository backups, which factor should you consider?

- A. Best practice is to perform backups on a daily basis.
- B. Backups can introduce the risk of a simultaneous failure in Vertica.
- C. The database backup should be viewed as a best practice and not a requirement.
- D. The backup interval depends on the data loss tolerance of the enterprise customer.

Correct Answer: D

QUESTION 5

In CA Performance Center, groups are organized in the Groups Tree. Which features characterize the Groups Tree? (Choose two)

- A. Its root level is called the Root Group node.
- B. It is used when an administrator manages groups.
- C. It includes the Defined Tenants sub-tree for groups in a tenant space.
- D. It includes a sub-node in the Defined Tenants sub-tree for Default Space groups.

Correct Answer: BC
