**QUESTION 1**

When you are editing a monitoring profile for the first time, you notice that the default detection rate is zero and the Update Metric Families check box is selected. How does this affect how the Data Aggregator monitors device reconfiguration?

- A. Device configuration will be set to false.
- B. Device configuration changes will be ignored.
- C. Device configuration changes will be immediately updated upon detection.
- D. Device reconfiguration will be checked when changes to the metric family occur.

Correct Answer: C

---

**QUESTION 2**

In CA Performance Center, groups are organized in the Groups Tree. Which features characterize the Groups Tree? (Choose two)

- A. Its root level is called the Root Group node.
- B. It is used when an administrator manages groups.
- C. It includes the Defined Tenants sub-tree for groups in a tenant space.
- D. It includes a sub-node in the Defined Tenants sub-tree for Default Space groups.

Correct Answer: BC

---

**QUESTION 3**

When you are planning Data Repository backups, which factor should you consider?

- A. Best practice is to perform backups on a daily basis.
- B. Backups can introduce the risk of a simultaneous failure in Vertica.
- C. The database backup should be viewed as a best practice and not a requirement.
- D. The backup interval depends on the data loss tolerance of the enterprise customer.

Correct Answer: D

---

**QUESTION 4**

Sue White is a Global Administrator who logs into a recently configured tenant as a tenant administrator. Why might Sue need to do this?

- A. Because this enables Sue to monitor tenants using a read-only view of settings configured by the tenant
- B. Because this is the standard way to create the Custom Vendor Configuration template that Sue can use for all future tenants
- C. Because this enables Sue to administer the tenant from the tenant perspective and perform tasks such as creating IP domains and user accounts
- D. Because as a Global Administrator who logs in as a tenant administrator, Sue can perform additional tasks that a tenant administrator would not be able to perform

Correct Answer: C

---

#### QUESTION 5

You are installing the Data Repository in a clustered configuration. What is the minimum number of hosts that you can use for your cluster?

- A. Two
- B. Three
- C. Four
- D. Five

Correct Answer: B
