QUESTION 1

During the closing meeting, the lead auditor should do which of the following?

- A. Accept the presentation of objective evidence.
- B. Review the auditor's qualifications.
- C. Perform a causal analysis with the auditee.
- D. Present a summary of audit results.

Correct Answer: D

QUESTION 2

For third-party audits, which two of the following factors should be considered by the auditor when agreeing to the amount of time needed to complete corrective action?

- I. The resources available to the auditor for determining when follow-up can occur
- II. The resources available to the auditee to enact the corrective action
- III. The auditee's experience in project evaluation techniques
- IV.

The number of findings recorded during the audit

- A.
- I and III
- B.
- I and IV
- C.
- II and III
- D.
- II and IV

Correct Answer: D

QUESTION 3

The following portion of the test includes several Case Studies. Each Case Study includes introductory information about a specific company or audit situation, followed immediately by a set of questions related to the situation described and various audit-related documents, identified by company name. All of the audit-related documents for these Case Studies are presented in a separate booklet labeled:

CONFIDENTIAL Audit Documents

These documents were drawn from actual companies and are designed to be examples of genuine audit materials. Their format and contents have not been altered, and they are intended to represent working documents from everyday situations. Although the documents for the Case Studies are presented separately, the test will be scored as a whole, on a total of 150 questions. You may go back and check your work on any part of the examination until time is called at the end of the testing period. Two auditors are conducting an internal audit of the Quality Electronics and Elements Co. (QEE) system procedures. During the first day of the audit, the following observations were made.

-An outbound carton with obvious damage was examined by the auditor on the shipping dock.

- A shipment of six (6) boxes to Allied Supply was returned because the customer-required certifications did not accompany the product.

-Unsigned product verification documents were found on stored products.

-

Of three (3) cartons found in the accepted materials station, only two of the cartons had labels indicating their contents. When the auditor pointed this out, a customer service representative immediately affixed the proper label to the one unlabeled carton.

-

The auditor also found that "Accepted Material Traveler Cards" were not attached to any of the cartons in the accepted materials station.

The auditor's finding on products without "Accepted Material Traveler Cards" should be written against which of the following departments?

- A. Production Control
- B. Quality Assurance
- C. Shipping
- D. Engineering

Correct Answer: C

QUESTION 4

Which of the following conclusions can be made by an auditor who observes that statistical process control (SPC) charts posted near operator workstations are done correctly and are regularly completed throughout the plant?

- A. Commitment of management to quality is strong
- B. Processes are being improved continually

- C. Shop floor staff have been fully trained
- D. SPC charts are available

Correct Answer: D

QUESTION 5

A quality audit observation is defined as:

- A. a noted item of objective evidence found during an audit
- B. an accepted level of audit findings defined as "major" and "minor"
- C. an auditor's initial notice of a potential nonconformance
- D. the lead auditor's perception of a potential problem

Correct Answer: A
