**QUESTION 1**

The Chief Information Officer (CIO) is selecting a hardware network solution that will optimize the WAN between company locations in North America and Europe. Which of the following can be changed by third-party hardware?

- A. IP latency
- B. TCP flow control
- C. Ethernet bandwidth
- D. UDP latency

Correct Answer: B

QUESTION 2

A new self-service provisioning system has been deployed to serve the company's rapid VM provisioning needs. Since the website is in the DMZ, HTTPS is required, but company policy states that SSL certificates can not terminate at the server. The company also has a requirement that the web portal be redundant while providing session state. Which of the following availability technologies can be used to meet the company's requirements?

- A. Failover
- B. Multipathing
- C. Load balancing
- D. Failback

Correct Answer: C

QUESTION 3

The corporate security department is recommending that the administrator deploys Type I hypervisor versus Type II. Which of the following is a security concern in regards to deploying a Type II hypervisor?

- A. Human error
- B. Performance benchmarks
- C. Additional software
- D. Administration time

Correct Answer: C

QUESTION 4

Which of the following components should be virtualized and added to cloud infrastructure to ensure virtual servers are only able to access the volumes assigned to them?

- A. NAS
- B. DAS
- C. LUN
- D. HBA

Correct Answer: D

QUESTION 5

A company has a virtualized environment. Hosts are configured to dynamically assign resources from the resource pool as required. Ann, an administrator is remotely connected to a host and is adding ten more guests. She suddenly loses connection to the host and fails to reconnect. Ann now finds that the server no longer responds when pinged. Which of the following BEST describes the issue?

- A. Over allocation of guest resources
- B. Over allocation of virtual resources
- C. Over allocation of storage resources
- D. Over allocation of host resources

Correct Answer: D
