QUESTION 1

What is the correct cardinality when using multi-mapping (target message structure >1) in an integration scenario without ccBPM?

- A. n:m
- B. n:1
- C. 1:1
- D. 1:n

Correct Answer: D

QUESTION 2

The Advanced Adapter Engine is installed as a component on the Integration Server.

When would you install the non-central Advanced Adapter Engine?

- A. When a firewall between the business system and the Integration Server prevents them from communicating directly
- B. When the business department requires Knowledge Management on a separate system
- C. When you want to use cross-component business process management (ccBPM) in the Advanced Adapter Engine
- D. When you want to use the advanced monitoring capabilities of the Integration Engine

Correct Answer: A

QUESTION 3

How does WS Reliable Messaging (WS-RM) protocol ensure the reliable delivery of messages?

- A. By signing the SOAP header and compressing the payload of the message
- B. By using the tRFC protocol for communication
- C. By specifying a sequence ID in the SOAP header of the message
- D. By sending a WS acknowledgment

Correct Answer: C

QUESTION 4

Which of the following lookup functions are available as standard functions in the graphical message mapping tool? (Choose two)

- A. RFC Lookup
- B. EJB Lookup
- C. ESR Lookup
- D. JDBC Lookup

Correct Answer: AD

QUESTION 5

After you create a business system in the System Landscape Directory, you can assign a transport target to this business system.

What is the purpose of a transport target?

- A. Transport targets are the names of technical systems that correspond to each other but are located in different technical system groups.
- B. Transport targets are the names of business systems that correspond to each other but are located in different business system groups.
- C. Transport targets are used to enhance performance of the transport process between systems that are located in different business system groups.
- D. Transport targets describe the message flow in messages sent from the business system that are located in different business system groups.

Correct Answer: B
