QUESTION 1

A large data center is hosting storage protection solutions for multiple companies. This solution is accomplished by the hosting organization's ability to consolidate data to an environment with two VNX arrays.

How many RecoverPoint clusters can be used in this environment?

- A. 12 clusters, assuming each LUN is attached to only one cluster at a time
- B. 6 clusters, assuming only vRPAs are used
- C. 12 clusters, assuming each LUN is replicated across the clusters
- D. 6 clusters, assuming each LUN is attached to only one cluster at a time

Correct Answer: A

QUESTION 2

You are creating a Consistency Group with the Protect Volumes wizard in a RecoverPoint/EX environment. What LUNs are displayed in the list generated by the wizard?

- A. LUNs masked to the RPAs
- B. LUNs configured on the licensed array
- C. LUNs attached to the splitter
- D. LUNs masked to the production host

Correct Answer: A

QUESTION 3

What collection period is automatically set when `Collect System Information` is run from the `System Events` pane?

- A. From 10 min. before to 10 min. after the selected event
- B. From 30 min. before to 30 min. after the selected event
- C. From 60 min. before to 60 min. after the selected event
- D. The previous 24 hours

Correct Answer: A

QUESTION 4

When adding a new vRPA, what is the only storage authentication method that is supported?

- A. CHAP
- B. iSNS
- C. RADIUS
- D. LDAP

Correct Answer: A

QUESTION 5

When is the Open Replicator RecoverPoint session created for each production volume in the Consistency Group (CG)?

- A. CG is enabled
- B. CG is created
- C. LUN is attached to the splitter
- D. LUN is added to an RSET

Correct Answer: A
