---

**QUESTION 4**

You have purchased 100 new computers from a vendor who will deliver 20 computers each week for the next five weeks. You have a comma-separated file containing pertinent information about each of the 100 machines. You want to create a task that will automatically install a new operating system on these computers as they are delivered. How can this be accomplished using the least amount of administrative effort?

- A. boot each machine into PXE Mode and select the proper task from the DOS Boot Menu
- B. install the LANDesk?client on each machine as it arrives; create a task to install the new operating system; as the last machine arrives, schedule the task to update the operating system
- C. use SCANGEN.EXE to create database records of each computer; create a migration task to install the required operating system; schedule and start the task; initiate a PXE boot on each machine as it is delivered
- D. use CSVIMPORT.EXE to create database records of each computer; create a migration task to install the required operating system; schedule and start the task; initiate a PXE boot on each machine as it is delivered

Correct Answer: D

---
