QUESTION 1

You work as a Software Developer for Mansoft Inc. You create an application and use it to create code access security policies. Which of the following tools will you use to examine and modify code access security policies from a batch file?

A. GacUtil.exe

B. StoreAdm.exe

C. Caspol.exe

D. Tlbimp.exe

E. Sn.exe

Correct Answer: C

QUESTION 2

Mark works as a Software Developer for McRobert Inc. He develops an ASP.NET application using Visual Studio .NET. The application loads department name and employee data only once in each user\\'s session. Mark creates two DataTable objects, named Employees and Departments. The

Departments object remains static, but the Employees object is modified whenever new employees join the company.

Mark wants to minimize the time it takes for the application to reload an ASP.NET page after each change. Which of the following statements will he use to accomplish this?

A. Session("Departments") = Departments Cache("Employees") = Employees

B. Cache("Departments") = Departments Cache("Employees") = Employees

C. Session("Departments") = Departments Session("Employees") = Employees

D. Cache("Departments") = Departments Session("Employees") = Employees

Correct Answer: D

QUESTION 3

You work as a Software Developer for ABC Inc. The Company uses .NET Framework as its application development platform. You are writing a method that might throw an exception at several points during its execution. You need to run several lines of code after the method runs, whether or not an exception occurs. Which of the following blocks will you use to accomplish this task?

A. Catch

B. Finally

C. Try

D. Throw

Correct Answer: B

QUESTION 4

You work as a Windows Application Developer for ABC Inc. The company uses Visual Studio .NET 2008 as its application development platform. You create a Windows Forms

application using .NET Framework 3.5. You need to execute a method named ProcAmount in the background of the application. The method requires that an integer value 101 is passed to it. You are required to pass an integer value 101 to start a background thread. Which of the following code segments should you use?

Each correct answer represents a part of the solution. Choose two.

A. ParameterizedThreadStart tStart; tStart = new ParameterizedThreadStart(ProcAmount); Thread thd = new Thread(tStart);

B. thd.Start(101);

C. ThreadStart tStart = new ThreadStart(ProcAmount); Thread thd = new Thread(tStart, 101);

D. thd.Start();

Correct Answer: A

QUESTION 5

You work as a Software Developer for ABC Inc. The company uses Visual Studio.NET as its application development platform. You create a Windows service application using the .NET Framework. You are required to synchronize execution of some resources across multiple processes.

What will you do to accomplish this task?

A. Use the Mutex class.

B. Use the Monitor class.

C. Use the ThreadPool class.

D. Use the Interlocked class.

Correct Answer: A
