QUESTION 1

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2008 as its application development platform. You create an ASP.NET Web application using .NET Framework 3.5. The application uses the health monitoring events to raise application audit events in the following situations:

I When users login

I When users modify their password

I When users perform other security-related actions

You must ensure that the application logs all audit events for all applications on the Web server.

What will you do?

- A. Configure the eventMappings Element in the Web.config file to allow an entry for success audits.
- B. Configure the eventMappings Element in the Web.config file to allow a single entry for auditing events that is present for all audits.
- C. Configure the eventMappings Element in the Machine.config file to allow an entry for success audits.
- D. Configure the eventMappings Element in the Machine.config file to allow a single entry for auditing events that is present for all audits.

Correct Answer: D

QUESTION 2

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2005 as its application development platform. You are developing an application using .NET Framework 2.0. You are required to use a datatype that will store only the numbers. The numbers should be in positive form and should not be larger than 65,535. Which of the following datatypes will you use to accomplish the task?

Each correct answer represents a complete solution. Choose two.

- A. int
- B. short
- C. System.UInt16
- D. ushort
- E. System.Int16

Correct Answer: CD

QUESTION 3

Allen works as a Software Developer for ABC Inc. The company uses Visual Studio.NET as its application development platform. He creates an application using .NET Framework. He wants to encrypt all his e-mails that he sends to anyone. Which of the following will he use to accomplish the task?

- A. PPP
- B. FTP
- C. PPTP
- D. PGP

Correct Answer: D

QUESTION 4

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2008 as its application development platform. You have recently finished the development of an ASP.NET Web application using .NET Framework 3.5.

The application must be deployed by using the <http://www.ABC.com/> URL. The application has several Web forms.

You need to implement Really Simple Syndication (RSS) feeds functionality. The RSS feeds will be used by the <http://www.ABC.com/Updates.rss> URL. You must ensure that the application displays the RSS-formatted information when

accessing the given URL. What will you do to accomplish this?

Each correct answer represents a part of the solution. Choose two.

- A. Create and register a custom `HttpHandler` class that releases the RSS feeds.
- B. Create a Web form named `Updates` that releases the RSS feeds.
- C. Create an ASMX Web service component named `Updates`.
- D. Add the `HttpHandler` class to the `.rss` extension.
- E. Create and register a custom `HttpModule` class.

Correct Answer: AD

QUESTION 5

John works as a Web Developer for TechCom Inc. He creates an ASP.NET application, named `MyApp1`, using Visual Studio .NET. Only registered users of the company will be able to use the application. The application contains a page, named `NewAccount.aspx` that allows new users to register themselves to the registered user list of the company. The `NewAccount` page contains several `TextBox` controls that accept users' personal details such as username, password, confirm password, first name, last name, home address, zip code, phone number, etc. One of the `TextBox` controls on the page is named `txtZipCode` in which a user enters a Zip code. John wants to ensure that when a user submits the `NewAccount` page, `txtZipCode` must contain five numeric digits. He wants least development effort. Which of the following validation controls will he use to accomplish the task?

Each correct answer represents a part of the solution. Choose all that apply.

- A. RequiredFieldValidator
- B. RegularExpressionValidator
- C. CompareValidator
- D. RangeValidator

Correct Answer: AB
