QUESTION 1

Andrew works as a Software Developer for Mansoft Inc. The company's network has a Web server that hosts the company's Web site. Andrew wants to enhance the security of the Web site by implementing Secure Sockets Layer (SSL). Which of the following types of encryption does SSL use?

Each correct answer represents a complete solution. Choose two.

- A. Symmetric
- B. Secret
- C. IPSec
- D. Asymmetric

Correct Answer: AD

QUESTION 2

Sam works as a Software Developer for SamTech Inc. He develops a Windows-based application, named App1, using Visual Studio .NET. He wants to set a security policy for the application. To accomplish the task he uses the PolicyLevel class. He wants to set the current policy level to the default state. Which of the following methods will he use to accomplish the task?

- A. Resolve
- B. ChangedNamePermissionSet
- C. Reset
- D. Recover

Correct Answer: C

QUESTION 3

Sam works as a Software Developer for BlueWell Inc. He creates a .NET Remoting object named MyObj using Visual Studio .NET. He wants to configure MyObj to send and receive confidential information from an XML file stored in an encrypted hard drive. What will he do to accomplish the task?

Each correct answer represents a part of the solution. Choose two.

- A. Implement a declarative security check.
- B. Implement an imperative security check.
- C. Use the SecurityAction.Demand value for the SecurityAction flag.
- D. Use the SecurityAction.RequestMinimum value for the SecurityAction flag.

Correct Answer: AD

QUESTION 4

You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET as its application development platform. You are creating an application using the .NET Framework. You write the following code snippet to call a method

from the Win32 API by using PInvoke:

```
int rst = MessageBox(hWd, Mytext, Mycaption, Mytype);
```

You are required define a method prototype. Which of the following code segments will you use to accomplish this task?

- A. `[DllImport("user32")] extern int MessageBoxA(int hWd, String Mytext, String Mycaption, uint Mytype);`
- B. `[DllImport("user32")] extern int Win32API_User32_MessageBox(Int hWd, String Mytext, String Mycaption, uint Mytype);`
- C. `[DllImport("user32")] extern int MessageBox(int hWd, String Mytext, String Mycaption, uint Mytype);`
- D. `[DllImport("C:\\WINDOWS\\system32\\user32.dll")] extern int MessageBox(int hWd, String Mytext, String Mycaption, uint Mytype);`

Correct Answer: C

QUESTION 5

You work as a Software Developer for ABC Inc. The company uses Visual Studio.NET 2005 as its application development platform. You create a Web service using .NET Framework 2.0. You want the Web service to utilize a two step process to map XML generated by Web methods to .NET objects. What will you do to accomplish the task?

Each correct answer represents a part of the solution. Choose two.

- A. Use deserialization
- B. Use serialization
- C. Use Marshal-by-ref objects
- D. Use Marshal-by-value objects

Correct Answer: AB
