QUESTION 1

While discussing the new HP StoreEasy solution, a customer expresses concerns about potential performance issues that have been associated with previous generations of Windows NAS systems.

Which new feature of the HP StoreEasy solution should you highlight to demonstrate the increased reliability and performance of the platform for files and applications?

- A. resilient file system (ReFS)
- B. support for Unified LUN Presentation from the GUI
- C. addition of Fibre Channel support for file shares, and storage for applications
- D. increased support for 35,000 concurrent users with three shares per single file server

Correct Answer: C

QUESTION 2

A customer requires a Digital Asset Management system with 140TB of high capacity, low performance disk storage. Their data center is in a hosted environment. Due to their data center per-rack-unit charging model, they have invested heavily in blade architecture which Virtual Connect Flex-10 connectivity. The Service Level Agreement mandates the data need to be highly available allowing for node failures.

Which HP Storage solution best meets the customer requirements?

- A. HP StoreVirtual 4000 Storage
- B. HP StoreServ 7200
- C. HP StoreSure 2000 Storage
- D. HP P4800 G2 LeftHand SAN

Correct Answer: D

QUESTION 3

You are a presales consultant for a medium-sized pharmaceutical company. The environment consists of an HP BladeSystem c3000 enclosure with a vSphere 5.1 infrastructure cluster and iSCSI as the main topology.

The new SLA requirements state that the infrastructure must be fully redundant. The customer advises you that firmware updates should be implemented online without experiencing any downtime. When designing the environment, which components should you recommend to meet the customer requirements? (Select two.)

- A. additional Host Bus Adapter mezzanine cards
- B. HP Insight Control and SUM licenses
- C. redundant Onboard Administrator modules

- D. HP Virtual Connect Enterprise Manager
- E. redundant Virtual Connect Flex-10 modules

Correct Answer: DE

QUESTION 4

Which advantage does an HP 3PAR StoreServ Storage System provide in an HP Virtual Connect FlexFabric environment?

- A. The Fibre Channel host ports are NPIV enabled.
- B. The VCEM can be used to configure the hosts on the storage system.
- C. The HP 3PAR StoreServ Storage Systems are FCoE ready.
- D. The Fibre Channel host ports can be attached directly to the FlexFabric modules.

Correct Answer: D

QUESTION 5

When designing an HP 3PAR StoreServ environment that involves HP Peer Motion, which configuration requirements must be considered? (Select Two)

- A. All host servers connected to the target array must be removed from the Fibre Channel zoning to prevent data corruption.
- B. Source and destination arrays must be at InForm software version 3.1.2 or higher.
- C. The destination system cannot import volumes with existing Remote Copy membership.
- D. Volume Sets are not supported during the migration and volume-set membership must be removed.

Correct Answer: BC
