QUESTION 1

How can a SiteScope administrator determine why SiteScope restarted unexpectedly?

- A. by checking the audit.log
- B. by checking the RunMonitor.log for the line "Shutting down SiteScope reason"
- C. by checking the SiteScope Health group
- D. by using jConsole.exe

Correct Answer: B

QUESTION 2

How do you activate and deactivate the "Quick Help" feature?

- A. Click on the "Page Options" UI Element on the Common Toolbar and select "Quick Help".
- B. Select "Quick Help" in the "Help" combo list on the Common Toolbar.
- C. Click the Quick Help button in the specific page or dialog box.
- D. Select Tools context > Help Tools > Quick Help (you must have Use tools permissions).
- E. Edit the /conf/ui.config file and change the value of the act_quick_help parameter to Y or N, respectively.

Correct Answer: C

QUESTION 3

Which HP applications can SiteScope integrate with out-of-the-box? (Select two.)

- A. HP Release Control
- B. HP Diagnostics
- C. HP Asset Manager
- D. HP Business Service Management
- E. HP Project and Portfolio Management

Correct Answer: BD

QUESTION 4

An application owner complains about receiving alerts for a problem considered intermediate in nature and requests that

they be shown a failed status if a problem occurs more than once. How can you configure a monitor to do this? (Select two.)

- A. Change the monitor setting to Verify error.
- B. Restart the SiteScope to clear the errant alert.
- C. Configure the alert to start only if an error occurs twice in a row.
- D. Set up the monitor to run a script instead of sending emails.
- E. Set up the monitor to send SMS instead of emails.

Correct Answer: AC

QUESTION 5

The system administrator is using a disk space monitor to verify that the root partition is not filling up and wants a notification in a dedicated log file when this occurs. How can this be accomplished?

- A. by integrating with Operations Manager and forwarding the incoming events to the administrator
- B. by writing a custom monitor to verify the disk space and writing to the log file when it is filling up
- C. by integrating with a third-party EMS monitoring system and forwarding the incoming events to the administrator
- D. by setting up a remote connection to the UNIX box, deploying a disk space monitor and setting up a script alert to write to the log file

Correct Answer: D
