-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Refer to the network exhibit.

Switch 1 and 2 are HP Provision switches. VLAN 33 has been defined as the management VLAN on both switches. Switch 1 is a layer 2 switch, and switch 2 is a layer 3 switch, with routing configured.

Based on this topology, which management connections to Switch 1 are out-of-band? (Select two)

- A. User4
- B. User-1
- C. User-3
- D. Switch 2
- E. User-2

Correct Answer: CE

### QUESTION 2

Which IMC options can a network administrator choose in order to automatically discover and import devices into IMC? (Select two.)

- A. IPsec VPN-based
- B. CDP-based
- C. LLDP-based
- D. MAC address-based

E. Routing-based

Correct Answer: AE

---

### QUESTION 3

What are the default logging properties for an HP Comware switch? (Select two.)

- A. Displays debugging output to the console
- B. Displays log messages to the console
- C. Uses the Information Center to control logging functions
- D. Uses the Event Log to save log messages
- E. Supports five logging levels

Correct Answer: BC

---

### QUESTION 4

A network administrator has an HP Comware switch that is configured with OSPF. The network administrator views the routing table and sees that a default route was learned from an OSPF neighbor (10.1.1.1). However, the network administrator wants to override this action and use a different neighbor (10.1.1.2) for the default route.

The network administrator configures this command:

```
[Comware] ip route-static 0.0.0.0 0 10.1.1.2
```

After configuring the command, the network administrator examines the routing table and notices that the original neighbor's default route is still in the routing table, but the static route is missing.

What is the cause of this problem?

- A. OSPF routes have a lower precedence value
- B. The ip default-gateway command must be used when creating a default route
- C. Only one routing protocol can be operational on a Comware device
- D. The static route has a syntax mistake

Correct Answer: A

---

### QUESTION 5

Refer to the network exhibit.

The network shown in the exhibit is comprised of four MSTP regions that are interconnected. Based on this topology, which statement is true?

- A. PVST should be used instead of MSTP
- B. A routing solution must be used between MSTP regions when more than one region exists
- C. An optimized topology can be created using MSTP between the regions
- D. The switches are running the equivalent of RSTP between the regions

Correct Answer: C
