QUESTION 1

Within system development, conflicts continually arise between stakeholders with regard to the requirements. As a requirements engineer, how do you handle conflicts in projects best? (1 Point)

- A. You resolve the conflict with the best resolution technique available to you.
- B. You analyze the conflict, try to bring about a solution with a suitable technique and document relevant information about the conflict.
- C. You ignore the conflict since this is a matter for project management.
- D. In order to resolve such conflicts you escalate them via the escalation paths defined in the project.

Correct Answer: B

QUESTION 2

One activity in managing requirements includes prioritization of the requirements. Which of the following criteria is not a sensible criterion for prioritization? (1 Point)

- A. The impact on the existing operational system (operating environment)
- B. The influence on the overall success of the business
- C. The effort for the validation of the requirements
- D. The costs resulting from the implementation of the requirements
- E. Which requirements must be implemented in which release

Correct Answer: C

QUESTION 3

You are employed as a requirements engineer in a company that develops control software for electric motors. During your work it becomes increasingly evident that the developers are very well aware of the necessary requirements, even though the requirements are not documented in their entirety. Nevertheless, you decide to document requirements systematically. Which two of the following arguments justifies this step? (2 Points)

Documenting requirements systematically is important, because...

- A. ... implementation without documented requirements is not possible.
- B. ... non-documented requirements are difficult to negotiate between the stakeholders.
- C. ... the coverage of the requirements by means of test cases cannot be checked.
- D. ... documented requirements are also good requirements.

Correct Answer: CD

QUESTION 4

You carry out modelling of requirements with a use case diagram. Which answer best describes its prospective modelling elements? (1 Point)

- A. Objects, activities and associations
- B. Actors, messages and activities
- C. Objects, use cases and activities
- D. Actors, use cases and associations

Correct Answer: D

QUESTION 5

The activity diagram below shows a simplified order processing procedure. Which of the following statements is correct for this flow? (2 Points)

- A. The flow is not modelled correctly, since no condition (branch) should be present within a fork.
- B. The flow is modelled correctly: the goods branch as well as the export and domestic order branch are processed in parallel to one another.
- C. The flow is not modelled correctly, since the branches for the domestic and export orders must be consolidated via a diamond symbol.
- D. The flow is modelled correctly and the "issue invoice" activity is conducted after the "compile goods" activity.

Correct Answer: C
