QUESTION 1

Configuration Management (CM) is an Information Technology Infrastructure Library (ITIL) IT Service Management (ITSM) process. Configuration Management is used for which of the following? 1.To account for all IT assets 2.To provide precise information support to other ITIL disciplines 3.To provide a solid base only for Incident and Problem Management 4.To verify configuration records and correct any exceptions

- A. 1, 3, and 4 only
- B. 2 and 4 only
- C. 1, 2, and 4 only
- D. 2, 3, and 4 only

Correct Answer: C

QUESTION 2

Walter is the project manager of a large construction project. He'll be working with several vendors on the project. Vendors will be providing materials and labor for several parts of the project. Some of the works in the project are very dangerous so Walter has implemented safety requirements for all of the vendors and his own project team. Stakeholders for the project have added new requirements, which have caused new risks in the project. A vendor has identified a new risk that could affect the project if it comes into fruition. Walter agrees with the vendor and has updated the risk register and created potential risk responses to mitigate the risk. What should Walter also update in this scenario considering the risk event?

- A. Project contractual relationship with the vendor
- B. Project management plan
- C. Project communications plan
- D. Project scope statement

Correct Answer: B

QUESTION 3
