QUESTION 1

In Microsoft Dynamics AX 2012, what is the effect of using an exists or notexists join clause between two tables in a select statement?

- A. Only the first table is populated by using the join clause.
- B. Only the second table is populated by using the join clause.
- C. Both tables are populated by using the join clause.
- D. Neither table is populated by using the join clause.

Correct Answer: A

QUESTION 2

You are working in a Microsoft Dynamics AX 2012 project. You modify the init method of the AccountingDistribution form in the VAR layer, and then modify the close method of the same form in the USR layer. You plan to export the AccountingDistribution form customizations from the Application Object Tree (AOT) into an .xpo file.

What will the .xpo file contain if you choose the user application object layer during the export process?

- A. only the init method modifications
- B. only the close method modifications
- C. only the init and close method modifications
- D. the init and close method modifications and the original code of the entire form

Correct Answer: B

QUESTION 3

In Microsoft Dynamics AX 2012, which of the following statements about the delegate node of a class in the Application Object Tree (AOT) is true?

- A. You can write code in a delegate.
- B. A delegate declaration must return a value.
- C. You can include modifiers such as public, protected, private, or static in a delegate declaration.
- D. You must declare the same type of parameters in a delegate as in the methods that are subscribed to the delegate.

Correct Answer: D

QUESTION 4

In Microsoft Dynamics AX 2012, some customers for whom customer information is stored in the CustTable table do not have corresponding bank account information stored in the CustBankAccount table. You need to produce a list of all customers with corresponding bank account information if it exists.

Which type of query join should you use?

- A. inner join
- B. outer join
- C. exists join
- D. not exists join

Correct Answer: B

QUESTION 5

In Microsoft Dynamics AX 2012, you need to erase the error messages written to InfoLog during the execution of a try-catch block.

Which X++ statement should you use?

- A. try
- B. retry
- C. throw
- D. catch

Correct Answer: B
