QUESTION 1

Kingsleigh has been learning about sniffer programs and found out that they can be used to collect information on networks. Kingsleigh would definitively like to gather a series of administrative passwords.

Which of the following would be the easiest for Kingsleigh to acquire information from using a sniffer?

- A. Shared Ethernet
- B. Fiber Optic
- C. Switch Ethernet
- D. ATM Networks

Correct Answer: A

QUESTION 2

Why is it so challenging to block packets from Remote Access Troans that use port 80 for network communications? Choose three.

- A. To a firewall, the traffic appears simply to be from an internal user making an innocuous HTTP GET request.
- B. Port 80 outbound is normally open on corporate firewalls
- C. Stateful inspection firewalls will block unsolicited inbound HTTP GET requests
- D. Not all firewalls are capable of inspecting data in the HTTP data fields for evidence of tunneling

Correct Answer: ABD

QUESTION 3

MS SQL server makes use of Stored Procedures. There is an extended stored procedure called sp_makewebtask that can be used with data being returned from executed queries. What would you use this stored procedure for?

- A. It is used to start a new web server instance
- B. It is used to create an HTML page
- C. It is used to perform an entry within a database
- D. It is used to schedule a job task

Correct Answer: B

QUESTION 4

Which of the following would represent a technique to embed data within another file whereby it would be near impossible for anyone using or looking at the file to claim that there might be a message hidden within the media or the existence of some form of message?

- A. Cryptography
- B. Encryption
- C. Steganography
- D. MimiCry

Correct Answer: C

QUESTION 5

Why is it often recommended to rename the built-in Administrator account on a Windows 2000 domain? Choose the best answer.

- A. Renaming the Guest account is of little value
- B. If you dont rename the Administrator account you will have NetBIOS name conflicts with the Administrator account from other domains in the forest
- C. Account lockout will not stop password guessing attacks via SMB filesharing or BASIC web authentication against the built-in Administrator account
- D. The default domain policy actually requires the Administrator account to be renamed

Correct Answer: C
