QUESTION 1

Which of the following describes an objective of Phase F: Migration Planning Phase?

A. Develop a Target Technology Architecture

B. Consolidate the Gap Analysis results from Phases B through D

C. Generate and gain consensus on an initial Architecture Roadmap

D. Coordinate the Implementation and Migration Plan with other frameworks

E. Operate the governance framework and manage an architecture contract

Correct Answer: D

QUESTION 2

Which section of the TOGAF template for Architecture Principles should describe situations where one principle would be given precedence over another?

A. Implications

B. Name

C. Rationale

D. Statement

E. Trade-oils

Correct Answer: C

QUESTION 3

Complete the sentence. The TOGAF Technical Reference Model _____

A. is an example and should be tailored to the needs of an organization

B. must be used "as is" for developing comprehensive architecture models

C. contains several industry specific frameworks

D. is intended to contain the Enterprise Continuum

E. contains only solution building blocks

Correct Answer: A

![Pass2Lead](https://Pass2Lead.com)
QUESTION 4

Complete the sentence. The Enterprise Continuum provides methods for classifying architecture artifacts as they evolve from.

A. Foundation Architectures to re-usable architecture assets

B. generic architectures to Oganization-Specific Architectures

C. generic solutions to Industry Models

D. generic architectures to reusable Solution Building Blocks E. Solutions Architectures to Solution Building Blocks

Correct Answer: B

QUESTION 5

Scenario:

Please read this scenario prior to answering the question

Your role is that of Lead Enterprise Architect working at the headquarters of a fast food chain. The chain

manages over 7500 restaurants across 33 countries. Each restaurant in the chain is an independently

owned and operated franchise.

Many of the restaurants still use the first generation IT systems deployed over 10 years ago. The Chief

Operating Officer (COO) of the chain has stated his concerns about the inefficiencies of the current

systems and identified the need to change. He has defined a new strategic vision that will enhance the

business including providing its franchisees new support services to help them address the increasing

competition from coffee shops. This is part of the long-term commitment to enhance the brand image and

increase revenue for the chain. He has also stated that he expects improved financial results by the end of

the current fiscal year.

The changes will help provide the chain with improved products, including healthier alternatives in the

menu, and more efficient operations. The addition of a corporate-wide data warehouse will provide

analytics that will enable the marketing group to improve its ability to target advertising and new products

to specific regions.

The chain has a mature Enterprise Architecture practice based in its headquarters and uses the TOGAF

standard as the method and guiding framework. The CIO is the sponsor of the activity.

In planning this change, the Chief Architect engaged the services of a well-known consulting firm that

![Pass2Lead](https://Pass2Lead.com)
specializes in business strategy. An initial study has been conducted to identify the strategic changes

needed to implement the COO\\'s vision. This recently completed with approval of a strategic architecture encompassing the entire chain, including detailed requirements and recommendations.

Based on the recommendation from the initial study, the decision has been taken for the chain to adopt a packaged suite of integrated application that is tailored to the needs of the franchise.

Refer to the scenario.

You have been asked by the Chief Architect to propose the best approach for architecture development to realize the COO\\'s vision.

Based on the TOGAF standard, Version 9.2, which of the following is the best answer?

A. You propose that the target architecture is defined first by going through the architecture definition phases (B-D). This is because the initial study identified the need to change. This will ensure that the change can be defined in a structured manner and address the requirements needed to realize the vision.

B. You propose that the baseline Technology Architecture is defined first in order to assess current infrastructure capacity and capability. Then the focus should be on transition planning and architecture deployment. This will identify requirements to ensure that the projects are sequenced in an optimal fashion so as to realize the vision.

C. You propose that the target architecture is defined first, followed by transition planning. This is because the vision is well understood and the strategic architecture agreed. The target first approach will ensure that the current problems and inefficiencies of the baseline architecture are not carried forward, and that the proposed solution addresses the requirements identified in the initial study.

D. You propose that the focus be placed on architecture definition, with emphasis on understanding the strategic change parameters. The requirements, drivers, issues and constraints for this engagement can then be identified. You would ensure that the target architecture addresses not functional requirements so as to ensure the target architecture is robust and secure.

Correct Answer: A
