-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Using WS-AtomicTransaction you wrap 3 SOAP-based Web services in a single transaction. When it is time to vote on the outcome of the transaction, 2 of the services vote to commit the changes made during the transaction, but a vote from the third service is not received. What will happen? Select the correct answer.

- A. The changes are committed because the transaction is considered successful as long as no Abort votes are received.
- B. The changes are rolled back because the transaction is considered unsuccessful when there is a missing vote.
- C. The changes are committed because the transaction is considered successful as long as one Commit vote is received.
- D. The changes are aborted because a transaction can only be considered successful when more than 2 Commit votes are received.

Correct Answer: B

QUESTION 2

Most industry-standard WS-* features are designed to be implemented as: Select the correct answer.

- A. WSDL operations
- B. WS-BPEL definitions
- C. SOAP headers
- D. HTTP headers

Correct Answer: C

QUESTION 3

A namespace can be considered a form of: Select the correct answer.

- A. unique identifier
- B. redundant identifier
- C. duplicate identifier
- D. Namespaces are not identifiers; they are always pre-defined values that we are required to work with.

Correct Answer: A

QUESTION 4

XSLT is a technology that is primarily used to address _____ . Select the correct answer.

- A. technology protocol bridging requirements (such as when .NET and Java components need to speak to each other)
- B. data model transformation requirements (such as when similar data based on different XML schemas needs to be exchanged)
- C. layer transformation requirements (such as when data located in different architectural layers needs to be exchanged between architectural layers)
- D. service transformation requirements (such as when two versions of the same service exist)

Correct Answer: B

QUESTION 5

To create REST services, you are required to deploy an enterprise service bus due to the need for inherent message routing functionality. Select the correct answer.

- A. True
- B. False

Correct Answer: B
