QUESTION 1

Which management protocol should you use to analyze network traffic in and out of a router interface?

- A. WMI
- B. Syslog
- C. IP service level agreement (SLA)
- D. sFlow

Correct Answer: D

QUESTION 2

You have created a custom report that shows "uptime" for each of your devices and would like to show the data from this report on the Orion Network Summary View. How should you accomplish this?

- A. from within Report Writer, select "Make this report available from the Orion website"
- B. add the "List of Reports" resource to the target view
- C. add the "Custom HTML" resource to the target view and specify a link to the uptime report
- D. add the "Report From Orion Report Writer" resource to the target view and specify the uptime report

Correct Answer: D

QUESTION 3

A network engineer notices the Syslog server's database is growing significantly in size due to the large number of devices sending Syslog messages. What should the engineer do to control database growth?

- A. configure the Syslog server to discard unwanted messages
- B. configure the devices and the Syslog server to use TCP-based Syslog
- C. configure the devices and the Syslog server to use SNMPv3
- D. configure the Syslog server to capture SNMP traps instead of Syslog

Correct Answer: A

QUESTION 4

One of your network administrators has deployed a new access control list (ACL) that blocks UDP port

69. As a result of this change, what might the network management system (NMS) NO longer be able to do?

- A. poll devices for status
- B. collect Syslog messages from your devices
- C. collect SNMP traps from your devices
- D. update IOS on your devices

Correct Answer: D

QUESTION 5

After making a configuration change to a gateway router, all of the devices past that router appear down in the network management system (NMS). However, the NMS is still gathering CPU and memory statistics on the devices. What is the first thing you should do to diagnose the issue?

- A. check the configurations of each affected device
- B. check the gateway router configuration for an access list change
- C. check the devices to see if any antivirus is blocking ICMP
- D. check the gateway router configuration to make sure a default route exists

Correct Answer: B
