**QUESTION 1**

Which two performance metrics can be affected by proper QoS implementation? (Choose two.)

- A. jitter
- B. shaping
- C. marking
- D. queuing
- E. latency

Correct Answer: AE

QUESTION 2

Which limitation does the Orion NPM Advanced Alert Engine place on trigger and reset actions?

- A. unlimited trigger actions, and unlimited reset actions
- B. unlimited trigger actions, but no reset actions
- C. limited to any one trigger action and one reset action per alert
- D. limited to one message action (such as Syslog, Traps) and one log action (such as Windows event log, NetPerfMon Log) per alert

Correct Answer: A

QUESTION 3

Austin and New York offices are connected through an MPLS cloud. You receive a trouble ticket stating that a video conference room in the Austin office cannot connect to the video conference room in the New York office. You verify the following information:

Trace routes from Austin to New York can make it to the last hop, which is your NYC router. The Austin conference subnet can reach other subnets within the New York office. What is a possible root cause for the lack of connectivity between conference stations?

- A. An access control list (ACL) is blocking ICMP traffic from Austin to New York.
- B. The New York video conference device is missing a default route.
- C. BGP is not set up correctly.
- D. The MPLS interface in your New York office is shutdown.

Correct Answer: B

**QUESTION 4**

Your network management system (NMS) leverages WMI to pull management data from Windows 2003 Servers. You have not deployed Active Directory, but your servers belong to a common workgroup. What should you do to ensure that your NMS has permission to query these servers?

- A. ensure that all of the servers are on the same service pack level
- B. ensure that all of the servers have the .NET framework 3.5 installed
- C. ensure that the account you are using exists on all of the servers
- D. ensure that the account and password you are using is the same on all of the servers

Correct Answer: D

QUESTION 5

Your company has asked you to expand your network management to include a new site with several hundred devices, although you are not sure how many. Using Orion Network Discovery, your top priority is completeness of discovery. Which two Orion discovery settings should you use to achieve your goal? (Choose two.)

- A. exclude any new subnets found during the network discovery
- B. include any new subnets found during the network discovery
- C. include specific IP addresses through a seed file
- D. decrease the overall speed of the discovery process
- E. decrease the number of SNMP retries
- F. increase the overall speed of the discovery process

Correct Answer: BD
