QUESTION 1

A BusinessWorks process must be deployed that receives input from an EMS topic and publishes data to an EMS queue. The topic and queue names must contain a token used for migrating between testing and production environments. The system administrator must be able to purge the topic and queue from within the TIBCO Administrator. Which two steps should be taken to create a TIBCO Administrator domain that meets these requirements? (Choose two.)

A. The EMS server should be added to the domain using the Domain Utility.

B. Topics and queues should be configured as global.

C. Topics and queues should be created as failsafe.

D. A global variable should be used for migrating between environments.

Correct Answer: AD
