**QUESTION 1**

A client is in the discovery process for building a React native app, which is a single codebase that runs natively on iOS and Android. The goal is to reduce development costs. The client wants to reduce content creation costs in the new react Native app by reusing as much of the marketing content already published in their AEM instance.

What should the Architect recommend to meet this requirement?

- A. Content Fragments
- B. Sling Resource Resolution
- C. Experience Fragments
- D. OSGi Bundles

Correct Answer: A

---

**QUESTION 2**

A customer maintains user accounts in an external database and wants to authenticate AEM users using the users stored in the database.

What should the Architect create?

- A. A custom authentication handler and external identity provider
- B. A customer authentication filter and a user sync handler
- C. A customer authentication filter and an external identity provider
- D. A customer authentication handler and an authentication filter

Correct Answer: D

---

**QUESTION 3**

A customer wants to cache a few secured pages served from AEM. What should the Architect do?

- A. Add Cache-Control header with optimal expiration time
- B. Enable permission-sensitive caching with an Auth Handler
- C. Cache secured pages on a different dispatcher server
- D. Use CDN for caching secured pages

Correct Answer: B

**QUESTION 4**

A customer has multiple web applications built on different platforms. The customer wants their users to access an AEM application without logging in if users have already logged in to any other application.

Which configuration should the Architect recommend?

- A. Granite SSO Authentication Handler
- B. Jackrabbit Oak External Login Module
- C. Granite OAuth Authentication Handler
- D. Granite Token Authentication Handler

Correct Answer: A

---

**QUESTION 5**

What should an AEM Architect do when installing a production Publish instance to connect to its associated Author instance?

- A. Execute the AEM installation using the nosamplecontent flag
- B. Copy the /content and /apps folders from the Maven repository
- C. Copy the entire crx-quickstart directory from the author
- D. Execute the installation using the cq5-author-jar refer

Correct Answer: A
