QUESTION 1

In the context of Analytics, what is faceting?

- A. Representing the number of widgets on a dashboard
- B. Filtering all related widgets in a dashboard by your selection
- C. Something only programmers can access
- D. Measuring the number of significant digits of precision for a particular metric
- E. Choosing the color of the background in a graph

Correct Answer: B

QUESTION 2

What do you have to assign to users before they can access Analytics?

- A. Analytics permission set license (PSL)
- B. Permission set with at least one Analytics user permission
- C. Username and password
- D. A and B
- E. B and C

Correct Answer: D

QUESTION 3

An Einstein Consultant needs to add some data values to an existing dataflow: a text field, a number (via a case statement), and a date (via SAQL).

In order to achieve this, which compute option should be used?

- A. computeExpression
- B. computeData
- C. computeValue
- D. computeField

Correct Answer: A

QUESTION 4

Which security option is not available in Einstein Analytics for securing datasets?

- A. Inherited security
- B. Row-level security with security predicates
- C. Field-level security
- D. App level security

Correct Answer: C

QUESTION 5

Which statement best describes how to ensure Einstein Analytics dashboards are easily used across both desktop and mobile devices?

- A. Create multiple layouts, and reorder all the widgets so that they fit nicely within the new default width.
- B. Create a single layout and allow Einstein Analytics to automatically organize dashboard contents to be optimal for the device type.
- C. Create a single layout and reorder all the widgets so that they fit nicely when viewing on either device.
- D. Create multiple layouts, ensure the layout selectors match the device, and resize/hide widgets as necessary to ensure the content is appropriate for the device screen size.

Correct Answer: D
