QUESTION 1

Which of the following statements, about the test reporting activities for a project adopting an iterative lifecycle model with very short iterations (e.g. two weeks iterations), is correct?

K2 1 credit

- A. Test reporting activities can't be influenced by the use of an iterative lifecycle model with short iterations
- B. Test reporting activities are not important for projects adopting an iterative lifecycle model with short iterations
- C. Test reporting activities are less important for projects adopting an iterative life cycle model with short iterations. They should be performed at the end of the last iteration
- D. Test reporting activities are still important with an iterative lifecycle. The reports can be used to conduct post-iteration review sessions before starting with the next iteration

Correct Answer: D

QUESTION 2

Which of the following statements about management of product quality risks in mature organizations with respect to the lifecycle, is true?

K2 1 credit

- A. Mature organizations address product quality risks associated to non-functional characteristics only during the system test phase
- B. Mature organizations are aware that the contribution of testing to analysis of product quality risks is very important. The analysis should occur throughout the entire lifecycle
- C. Mature organizations don't waste time identifying the sources of risks. They only focus on identifying product quality risks
- D. Mature organizations are aware that risk management of product quality risks only occurs during testing

Correct Answer: B

QUESTION 3

During the follow-up phase the following conditions are checked: X1. The code has been completely reviewed X2. All the identified defects have been correctly fixed and the modified code has been compiled

successfully and run through all the static analyzers used by the project without warnings and errors X3. The modified code is available under the configuration management system with a new version number for the specified CI

If these conditions are fulfilled then the review process terminates. Which of the following characteristics of a formal review is missing in this description?

K2 1 credit

- A. Defined entry and exit criteria
- B. Checklists to be used by the reviewers
- C. Deliverables such as reports, evaluation sheets or other review summary sheets
- D. Metrics for reporting on the review effectiveness, efficiency, and progress

Correct Answer: D

QUESTION 4

You are the Test Manager for a project to develop a client-server application that allows wine vendors to order custom-assorted packages of wines of several winemakers to sell special packages in their wine shops.

You decide to apply a blended risk-based and reactive testing strategy. Below the exit criteria for the system testing. EXCR1- Each "critical" quality risk item must be covered by at least one test condition EXCR2- Each "critical" requirement must be covered by at least one test condition The following are the "critical" requirements of the application:

REQ-SEL-1. The application shall allow the user to order only one package at a time REQ-SEL-2. The application shall allow the user to select between four different packages (2-bottles, 6bottles, 12-bottles, 15-bottles)

REQ-SEL-3. The application shall allow the user to order a package containing at least 1 bottle and no more bottles than the package size. No error messages shall be displayed if the user selects a valid number of bottles (at least 1 bottle and no more than the package size)

REQ-SEL-4. The application shall display an error message "Invalid number of bottles" if an invalid number

of bottles is selected by the user (zero bottles or a number higher than the package size) REQ-PAY-1. The application shall allow the user to pay with the three accepted credit cards (Visa, MasterCard, American Express)

REQ-PAY-2. The application shall display an error message "Invalid credit card" if invalid credit card data are given by the user The following is the unique "critical" quality risk item that has been identified:

CR-RSK-1. The GUI of the application might accept non-integer values for the input field designed to get the number of bottles from the user Test analysis for system testing has just begun and the following test conditions have been identified. TC-SEL-2. Test the selection of the package sizes

TC-SEL-4. Test wrong numbers of bottles for an order TC-CR-RSK-1. Test the accepted values from the input field designed to get the number of bottles from the user

What is the MINIMUM number of test conditions that must be added to fulfill both the EXCR1 and EXCR2 exit criteria?
K3 2 credits

- A. 4
- B. 3
- C. 2
- D. 1

Correct Answer: A

QUESTION 5

Which of the following statements best describes an appropriate approach for managing exploratory testing?

Number of correct responses: 1

K2 1 credit

- A. Define very detailed mission statements, which allow testing work to be broken into sessions of up to 10 minutes duration in which testing is guided by these mission statements
- B. Break the testing work in 30 to 120 minutes sessions and use properly defined mission statements consisting of two or three sentences to guide testing during these sessions
- C. Define very generic charters to drive exploratory testing sessions of 2 days where testers are completely free to decide what to test
- D. Exploratory testing should not be managed because such testing is inherently unmanageable and not measurable

Correct Answer: B
