**QUESTION 1**

You need to meet the connection requirements for the New York office. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

**Answer Area**

From the Azure portal:	Create an ExpressRoute circuit only.
	Create a virtual network gateway only.
	Create a virtual network gateway and a local network gateway.
	Create an ExpressRoute circuit and an on-premises data gateway.
	Create a virtual network gateway and an on-premises data gateway.

In the New York office:	Deploy ExpressRoute.
	Deploy a DirectAccess server.
	Implement a Web Application Proxy.
	Configure a site-to-site VPN connection.

**Answer Area**

From the Azure portal:	Create an ExpressRoute circuit only.
	Create a virtual network gateway only.
	Create a virtual network gateway and a local network gateway.
	Create an ExpressRoute circuit and an on-premises data gateway.
	Create a virtual network gateway and an on-premises data gateway.

In the New York office:	Deploy ExpressRoute.
	Deploy a DirectAccess server.
	Implement a Web Application Proxy.
	Configure a site-to-site VPN connection.

Box 1: Create a virtual network gateway and a local network gateway. Azure VPN gateway. The VPN gateway service enables you to connect the VNet to the on-premises network through a VPN appliance. For more information, see Connect an on-premises network to a Microsoft Azure virtual network. The VPN gateway includes the following elements:

\*

Virtual network gateway. A resource that provides a virtual VPN appliance for the VNet. It is responsible for routing traffic from the on-premises network to the VNet.

\*

Local network gateway. An abstraction of the on-premises VPN appliance. Network traffic from the cloud application to the on-premises network is routed through this gateway.

\*

Connection. The connection has properties that specify the connection type (IPSec) and the key shared with the on-premises VPN appliance to encrypt traffic.

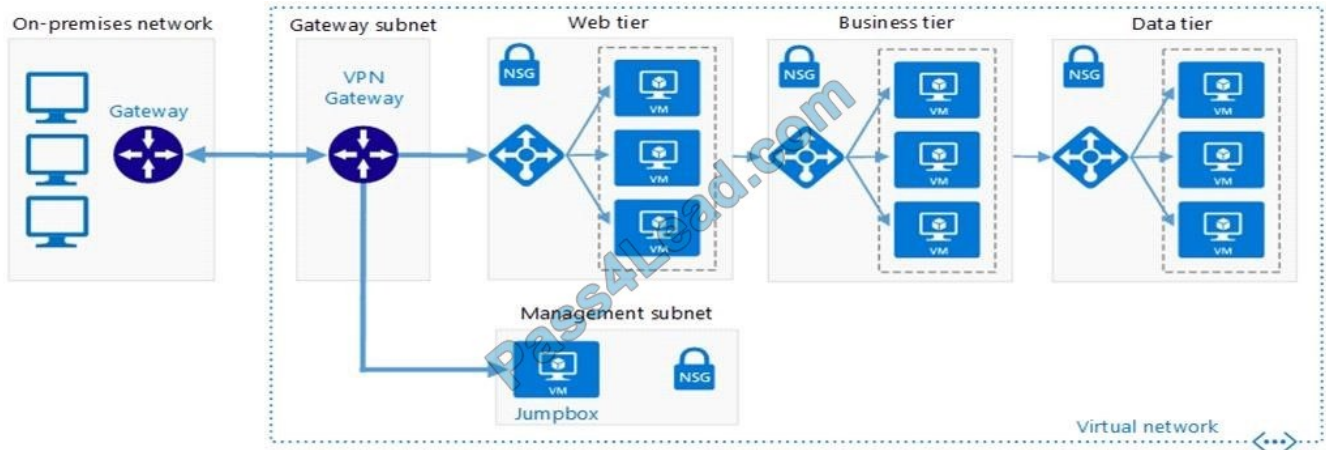

\*

Gateway subnet. The virtual network gateway is held in its own subnet, which is subject to various requirements, described in the Recommendations section below.

Box 2: Configure a site-to-site VPN connection

On premises create a site-to-site connection for the virtual network gateway and the local network gateway.

Scenario: Connect the New York office to VNet1 over the Internet by using an encrypted connection.

Incorrect Answers:

Azure ExpressRoute: Established between your network and Azure, through an ExpressRoute partner. This connection is private. Traffic does not go over the internet.

## QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have an Azure virtual machine named VM1 that

runs Windows Server 2016. You need to create an alert in Azure when more than two error events are logged to the System log on VM1 within an hour.

Solution: You create an Azure Log Analytics workspace and configure the data settings.

You add an extension to VM1.

You create an alert in Azure Monitor and specify the Log Analytics workspace as the source.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Instead: You create an Azure Log Analytics workspace and configure the data settings.

You install the Microsoft Monitoring Agent on VM1.

You create an alert in Azure Monitor and specify the Log Analytics workspace as the source.

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/agents-overview>

### QUESTION 3

You deploy an Azure Kubernetes Service (AKS) cluster named Cluster1 that uses the IP addresses shown in the following table.

IP address	Assigned to
131.107.2.1	Load balancer front end
192.168.10.2	Kubernetes DNS service
172.17.7.1	Docker bridge address
10.0.10.11	Kubernetes cluster node

You need to provide internet users with access to the applications that run in Cluster1. Which IP address should you include in the DNS record for Ousted?

- A. 172.17.7.1
- B. 131.107.2.1
- C. 192.168.10.2
- D. 10.0.10.11

Correct Answer: B

When any internet user will try to access the cluster which is behind a load balancer, traffic will first hit to load balancer front end IP. So in the DNS configuration you have to provide the IP address of the load balancer.

<https://stackoverflow.com/questions/43660490/giving-a-dns-name-to-azure-load-balancer>

### QUESTION 4

You download an Azure Resource Manager template based on an existing virtual machine. The template will be used to deploy 100 virtual machines. You need to modify the template to reference an administrative password. You must

prevent the password from being stored in plain text.

What should you create to store the password?

- A. Azure Active Directory (AD) Identity Protection and an Azure policy
- B. a Recovery Services vault and a backup policy
- C. an Azure Key Vault and an access policy
- D. an Azure Storage account and an access policy

Correct Answer: C

You can use a template that allows you to deploy a simple Windows VM by retrieving the password that is stored in a Key Vault. Therefore the password is never put in plain text in the template parameter file.

<https://azure.microsoft.com/en-us/resources/templates/101-vm-secure-password/>

---

## QUESTION 5

You have an Azure virtual machine named VM1 that runs Windows Server 2019. You sign in to VM1 as a user named User 1 and perform the following actions:

\*

Create files on drive C.

\*

Create files on drive D.

\*

Modify the screen saver timeout.

\*

Change the desktop background.

You plan to redeploy VM1.

Which changes will be lost after you redeploy VM1?

A.

the modified screen saver timeout

B.

the new desktop background

C.

the new files on drive D

D.

The new files on drive C

Correct Answer: C

As D drive is temporary storage so new files on D drive will be lost. The screensaver, wall paper, new files on C drive are available after Redeploy.
