**QUESTION 1**

You have two servers that run Windows Server as shown in the following table.

| Name    | Location              | Domain/workgroup |
|---------|-----------------------|------------------|
| Server1 | On-premises           | Domain           |
| Server2 | Azure virtual machine | Workgroup        |

You need to copy the contents of volume E from Server1 to Server2. The solution must meet the following requirements:

Ensure that files in-use are copied. Minimize administrative effort. What should you use?

- A. Storage Migration Service
- B. Azure File Sync
- C. Azure Backup
- D. Storage Replica

Correct Answer: A

---

**QUESTION 2**

You are planning the data share migration to support the on-premises migration plan. What should you use to perform the migration?

- A. Storage Migration Service
- B. Microsoft File Server Migration Toolkit
- C. File Server Resource Manager (FSRM)
- D. Windows Server Migration Tools

Correct Answer: A

---

**QUESTION 3**

DRAG DROP You need to create a Hyper-V hyper-converged cluster that stores virtual machines by using Storage Spaces. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Actions**

- Enable Storage Spaces Direct.
- Add a Scale-Out File Server for application role.
- Create a Distributed File System (DFS) namespace.
- Create a failover cluster.
- Create a file share.
- Create a volume.

**Answer Area**

Correct Answer:

**Actions**

- Add a Scale-Out File Server for application role.
- Create a Distributed File System (DFS) namespace.
- Create a file share.

**Answer Area**

- Create a failover cluster.
- Enable Storage Spaces Direct.
- Create a volume.

**QUESTION 4**

Your network contains an Active Directory Domain Services (AD DS) domain. The domain contains 20 Active Directory sites. All user management is performed from a central site.

You add users to a group.

You discover that group changes do NOT appear on a domain controller in a remote site.

You need to identify whether the group changes appear on other domain controllers.

What should you use?

- A. Microsoft Support and Recovery Assistant
- B. File Replication Service (FRS) Status Viewer
- C. Active Directory Replication Status Tool
- D. Active Directory Sites and Services

Correct Answer: D

**QUESTION 5**

You have a server named Server1 that runs the Remote Desktop Session Host role service. Server1 has five custom applications installed.

Users who sign in to Server1 report that the server is slow. Task Manager shows that the average CPU usage on

Server1 is above 90 percent. You suspect that a custom application on Server1 is consuming excessive processor capacity.

You plan to create a Data Collector Set in Performance Monitor to gather performance statistics from Server1.

You need to view the resources used by each of the five applications. Which object should you add to the Data Collector Set?

- A. Processor information
- B. Processor
- C. Process
- D. Processor performance

Correct Answer: C
