QUESTION 1

A Digital Developer must give users the ability to choose an occasion (holiday, birthday, anniversary, etc.) for which gifts are currently being selected. The data needs to be persistent throughout the current shopping experience. Which data store variable is appropriate, assuming there is no need to store the selection in any system or custom objects?

- A. Request scope variable
- B. Page scope variable
- C. Session scope variable
- D. Content slot variable

Correct Answer: C

QUESTION 2

An instance has custom logging enabled. The log reaches the file size limit. What happens in this situation?

- A. The current log file is archived and a new log file is created
- B. The log file is deleted and a new log file is created
- C. Logging is suspended for the day
- D. The log file rolls over and the oldest log messages are overwritten

Correct Answer: C

QUESTION 5

A Digital Developer added a file named MyBusinessController.js in the cartridge named app_project. The project design calls for this new file to override MyBusinessController.js in client_project. The client_project cartridge contains other necessary functionality. Additional functionality is also included in the storefront_core and storefront_controllers cartridges.

Which cartridge path meets the project requirements?

- A. client_project:app_project:storefront_controllers:storefront_core
- B. app_project:storefront_controllers:storefront_core
- C. app_project:client_project:storefront_controllers:storefront_core
- D. storefront_core:storefront_controllers:client_project:app_project

Correct Answer: C
